

SIGNIFIRE™ DEMO KIT

DESCRIPTION

Fike offers a complete Signifire Demo Kit to meet all your sales promotion and training needs on this exciting video detection product. This kit is a perfect way for you to familiarize yourself with the system setup, configuration, and overall capabilities. It can also be used as a sales tool to demonstrate this revolutionary technology and its benefits to customers or architect and engineer firms and setup up in a matter of minutes.

The Signifire system by Fike, provides complete video, flame, smoke and intrusion detection. It provides a critical advantage for early warning fire detection, identifying and reacting to fire situations in their earliest stages, and protecting lives and property. Some key features of the system are as follows:

- Detects Smoke or Flame in seconds
- Supplies vital, situational live video to remote locations
- Triggers fire alarm systems
- Provides pre-recorded video forensic evidence for fire investigations
- Provides video surveillance capabilities

All Signifire cameras within a system can be configured with multiple detection and/or exclusion zones within a specific field of view. These zones are set to either detect specific events (fire, smoke and motion) within the zone, or detect events outside the zone. An activation of a zone can also be linked to time schedules allowing the system to always be working when you need it, but not interfering with special events or circumstances.

KIT INCLUDES

- (2) Signifire IP Cameras
- (2) Magnetic Mounts for the Cameras
- (1) Laptop with NVR and SpyderGuard software installed
- (1) POE Switch
- All Required Cables
- Hard Travel Case for Storage
