Gas Detection and Aspirating Smoke Detection Plus Environmental Monitoring

Expanding on the market-leading VESDA air-sampling smoke detection technology, Xtralis has developed the industry’s first system to combine ASD with gas detection and environmental monitoring.

VESDA ECO by Xtralis provides protection from both fire and gas threats in powerful yet cost-effective configurations to provide point, zone or total-area coverage in battery-charging rooms, underground utility tunnels, boiler rooms, warehouses, manufacturing facilities, parking garages, transportation centers, and a variety of other applications.

How It Works

VESDA ECO uses an existing VESDA air-sampling pipe network to actively monitor for gas leaks and continuously ensure air quality in occupied areas. This simple expansion requires no construction and does not involve installing electrical conduit.

ECO reliably detects unseen hazards by conditioning or filtering the air to remove moisture, interferent gases, dirt and other particulates that can cause traditional point gas detection systems to false alarm or become contaminated.

The VESDA ECO detector is configured using Xtralis VSC configuration software and can be monitored using Xtralis VSM4 monitoring software. Both VSC and VSM can be used to download data from the on-board memory card for data analysis and trending of historical data.

Integration with other building systems, including fire alarm control panels, PLCs, HVAC and building management systems, provides real-time situational awareness for intelligent emergency response. For example, VESDA ECO can be used in a transportation hub to monitor carbon monoxide and nitrogen dioxide levels, activating variable-speed fans as part of a demand-controlled ventilation system, which controls costs and saves energy.

Monitor Two Gases with Each VESDA ECO Detector

Each ECO gas detector can house up to two gas sensors, and additional detectors can be added easily to the VESDA pipe network to monitor more gases if required. Pre-calibrated sensor cartridges are easily replaced in the field and make converting to different gas sensors or replacing sensors a simple task.

With VESDA ECO by Xtralis, you can proactively protect your facility with early warning fire and gas detection and maintain enterprise air quality – with significant costs savings and more reliable results over traditional gas detectors.

Hazardous area certified variants of VESDA ECO are available (Approval pending).

1) Consult with Xtralis if application requires removal of interferent gases.
VESDA ECO™ Detector

VESDA ECO part number structure

Detectors complete with sensors:
ECO-D-B-AA
A VESDA ECO detector complete with a single gas sensor cartridge. Substitute AA with sensor gas code from table below.

ECO-D-B-AA-BB
A VESDA ECO detector complete with a dual gas sensor cartridge. Substitute AA & BB with sensor gas codes.
See available dual sensor combinations from the table below.

Replacement sensor cartridges:
ECO-SC-AA
A VESDA ECO replacement single gas sensor cartridge. Substitute AA with sensor gas code from table below.

ECO-SC-AA-BB
A VESDA ECO replacement dual gas sensor cartridge. Substitute AA & BB with sensor gas codes.

Specifications

- Supply Voltage: 18-30 VDC
- Current Consumption @ 24 VDC: 3.2 W
- Power Consumption @ 24 VDC
- Current Consumption: Typically 60 mA @ 24 V DC for a dual gas (flammable / toxic) quiescent. 85 mA when in alarm.
- Dimensions (WHD): 34 mm x 125 mm x 110 mm (1.3” x 4.9” x 4.4”)
- Weight: 250 g (0.6 pounds)
- IP/NEMA ratings: IP65 and NEMA 4
- Operating Conditions:
  - Detector Ambient: -20 to 55ºC (-4 to 131ºF)
  - Sampled Air: -20 to 55ºC (-4 to 131ºF)
  - Humidity: 10-95% RH, non-condensing
- Pipe Size: External Diameter 25 mm (EU), ¾” (US/CAN)
- Wire/Terminal size: 1.5 mm² 16 AWG maximum, shielded twisted pair
- Cable Access and Termination: 2xM16 bulkhead grommets
- Accuracy: +/- 5%
- Outputs:
  - 4 wire RS 485 Modbus RTU (2 wire data comms + 2 wire power)
  - Four (4) programmable relays 30 VDC 1A
  - One (1) 4-20 mA output per sensor
- Onboard Memory Card: Micro SD card 2 GB

Installation

VESDA ECO is designed to press fit on to VESDA air-sampling pipe work. To fit VESDA ECO simply remove a 60 mm section of pipe when using 25 mm OD air-sampling pipe work or 4” for ¾” BSP pipe.

VESDA ECO provides total flexibility to install one or more detectors anywhere on the pipe network to enable monitoring of a specific point, zone or total area.
