

Industrial Dry Chemical

Low-Overhead Nozzle

A UTC Fire & Security Company

Effective: March 2007

K-83-009

P/N: 844258

DESCRIPTION

Low-Overhead nozzles are designed to discharge a solid cone of dry chemical down onto a protected area from a fixed location above the protected area.

The Low-Overhead Nozzle uses a screen at the nozzle outlet to reduce the velocity of the dry chemical discharge. This allows the nozzle to be positioned closer to the surface of a flammable liquid.
