**FEATURES**

- UL Listed
- Tested to UL 2166
- Tee Bolt Quick-Release Clip
- Designed Custom Fit to Ensure Proper Horizontal or Vertical Mount Alignment

- Corrosion Resistant
- Durable Construction; Made of Stainless Steel and SAE 1020 Steel

**DESCRIPTION**

Kidde Fire Systems, tee bolt quick-release Cylinder Bracket is Listed by the Underwriters Laboratory, Inc. (UL) and designed specifically for use with the Kidde In-Cabinet/Small Enclosure Systems. The tee bolt, quick release strap is offered in three (3) sizes to accommodate all the In-Cabinet/Small Enclosure cylinder and valve assembly offerings. The strap is made of high quality steel, and is durable enough to withstand the typical industrial, installation environments. In addition, the bracket will accommodate the cylinder if it is installed in a horizontal or vertical position. The cylinder valve fits only one-way into the bracket, such that the siphon tube in the cylinder is oriented correctly to achieve proper agent flow.

**INSTALLATION**

Simply mount the bracket to a wall or structure that is strong enough to support the cylinder during a discharge event. Once it is mounted, the cylinder can be strapped into place using the tee bolt clip on the strap. If needed, once the strap has been secured, the adjusting nut can be tightened to further secure the cylinder in place.

⚠️ WARNING

Always ensure that the safety cap is on the cylinder when strapping the cylinder in place or before removing cylinder from the strap. Failure to comply with this warning could result in injury to personnel or property damage.
**SPECIFICATIONS**

- **Body**: SAE 1020 Steel
- **Strap**: Stainless Steel
- **Finish**:
  - Body: Black
  - Strap: Stainless Steel, No Finish
- **Approximate Weight**:
  0.85 lb. (0.39 kg), P/N 06-220037-001
  1.05 lb. (0.48 kg), P/N 06-220037-002
  2.31 lb. (1.05 kg), P/N 06-220037-003
