FEATURES
- UL Listed
- Tested Per UL 2166
- Durable Stainless Steel Construction
- Used in CXV Control System, 24 Vdc
- For Use with CXV Control System and In-Cabinet/Small Enclosure Systems Only

DESCRIPTION
The Kidde Fire Systems Electric Solenoid Assembly is Listed by the Underwriters Laboratory, Inc. (UL) and has been designed for use with the CXV™ Controller and the Kidde In-Cabinet/Small Enclosure Systems. The Electric Solenoid comes standard in the CXV Controller kit. The Electric Solenoid operates directly on the latch of the CXV Controller to operate the system. The spare kit includes two mounting screws and the bracket push plate mounted onto the body of the Electric Solenoid.

INSTALLATION
The Electric Solenoid can be installed into the CXV Controller, just under the latch (see Figure 1). For additional information, please reference the Design, Installation, Operation and Maintenance Manual, P/N 90-FM200M-040

WARNING
Where electric detection and/or actuation is provided, supervision shall be provided in accordance with NFPA 17A. Electrical wiring and equipment shall be provided in accordance with NFPA 72 national Electric code or at the request of the Authority Having Jurisdiction.

Note: Wiring the Electric Actuator through a Microswitch is required. The releasing loop should be wired through the common and normally closed (N.C.) contacts. Releasing the CXV Controller opens the contact and stops the releasing current.
