

MRCS FOR QUALITY/HEDIS® INITIATIVES

MEDICAL RECORD WORKFLOW AUTOMATION & ANALYTICS

HEALTH
DATA
VISION, INC.

Health Data Vision, Inc. (HDVI) is a healthcare software company that is disrupting the medical record retrieval and review (MRR) industry. We provide Medicare Advantage, Medicaid and Commercial ACA health plans with a HIPAA compliant, enterprise-class, Software-as-a-Service (SaaS) workflow automation and analytics platform for Quality Improvement and Risk Adjustment initiatives, which we call MRCS.

HDVI's MRCS platform unshackles health plans, giving you greater choice around when and how to execute your HEDIS® initiatives throughout the year.

HEDIS® Season Projects

Whether you use HDVI's full-service option for medical record retrieval, HEDIS® abstraction, and quality assurance, or perform these HEDIS® initiatives on a self-service basis, MRCS maximizes your efficiency.

The Medical Record Quality Assurance (MRQA) module allows Abstractors (yours or ours) to perform comprehensive review of incoming chart images, ensuring completeness and accuracy relative to each measure, currently based on 2018 Specifications.

The Abstraction tool is fully integrated with the PDF medical record and data entry tool. Our drag-and-drop approach for assigning work to Abstractors provides easy workflow balancing.

MRCS provides multi-level Overread capabilities (your team and/or ours) to ensure abstraction accuracy. MRCS allows you to launch "secondary pursuits" from MRQA, Abstraction or Overread stages in the workflow.

MRRV Wizard & Audit Prep tool ensures no surprises in audits, as you can begin prepping medical records for audits at any time.

MRCS analytics allow for real-time project status analytics.

Off-Season HEDIS® Projects

MRCS platform allows health plans to perform off-season HEDIS® projects, such as supplemental data collection, in a total platform solution. MRCS provides member-level compliance scoring using **2018 NCQA HEDIS® Technical Specifications** for hybrid and administrative data.

Why wait for HEDIS® season to begin? Let MRCS help you meet your chart retrieval and abstraction needs year-round.
