

TRUSTCOMMERCE®

SAFEGUARDING DATA. POWERING PAYMENTS.

Deliver a Seamless Omnichannel Experience

Accept payments from any channel securely with consolidated reporting.

As you expand your payment options, you do not need to increase the number of vendors with which you work. TrustCommerce® is your single source for powering payments from many channels.

Retail/POS

Encrypting card readers, EMV

TrustCommerce provides powerful tools to process point-of-sale (POS) payments securely. Accept all major types of payment—credit card, debit card, ACH/Echeck with ease. Limit card-present fraud resulting from counterfeit, lost, and stolen cards with EMV. Reduce risk and exposure by leveraging encrypting card devices for point to point encryption.

E-Commerce

Transparent redirect

TC Trustee® API is a fully integrated web-based payment application that seamlessly integrates into the

checkout process of a shopping cart, donation page, or other payment page. Your customer's sensitive payment data is sent directly to our secure payment processing platform, without ever passing through your environment. Additionally, the transaction is seamless, with full branding capabilities because your customer never sees a TrustCommerce web site.

Hosted payment pages

TC Trustee® Premier is a hosted payment application offering a secure environment in which to collect sensitive cardholder data outside a merchant's network environment. With TC Trustee Premier, your customer is redirected to a TC hosted payment page where they enter their sensitive payment data. The hosted page can be customized for a seamless user experience. With its responsive design, can be used for email, text, mobile and iframe.

Mobile Device

Secure payments from your device

With PayWithIt®, you can securely and wirelessly capture

payments via encrypting card swipe from your mobile device.

Whether accepting payments, reconciling transactions or viewing basic reports, transaction data remains protected at all points.

Mail Order/Telephone Order

Virtual terminal and reporting services

Keep call centers and back office secure using encrypting key pads with

the TC Vault® Virtual Terminal. Secure Reading and Exchange of Data (SRED) devices encrypt data at the point of entry providing a reliable security solution that aligns with PCI DSS requirements.

TC Vault is a web-based virtual terminal and reporting tool used for processing one-time, recurring, or installment payments for credit, debit, and ACH/electronic check transactions.
