

Simple, Secure Multi-Channel Payments for Software Vendors

Add payments to your software solution with Sphere's Hosted Multi-Channel Payment Suite.

Easily integrate payment capabilities into your software platform. With our SaaS-based service and architecture, Sphere provides a true Multi-Channel solution and one of the simplest integrations on the market.

One Source, Many Payment Channels

Highly scalable, Sphere's hosted payment solutions for ISVs enable secure payments from many channels, **through a single integration**. Using a hosted model, sensitive payment data stays out of your environment, reducing PCI scope. One integration connects you to:

- Hosted Payments for Ecommerce – Accept payments online.
- Hosted Payments for Countertop - Utilizes an EMV ID TECH Augusta device that works "out of the box" with no software updates or drivers needed for card-present solutions.
- Hosted Payments for Call Center or Back Office – Take payments by phone, securely using PCI validated P2PE keypads.

What's Available?

E-commerce

- Accept online payments
- Hosted payment capture page
- Light integration effort
- Minimize PCI scope
- Highly customizable

Call Center or Back Office

- Accept payments over the phone
- Encrypted PAN entry using the IDTECH SREDKey '2'
- Optional validated P2PE
- Light integration effort
- Highly customizable

Countertop

- Accept card present payments
- MSR and EMV payments using the IDTECH Augusta 'S'
- Optional validated P2PE
- Light integration effort
- Highly customizable
- No need to install drivers, plug n play

Online Merchant Account

- Self-service merchant account application
- Account approvals in as little as 24 hours

Easy to Integrate

Avoid excessive coding and longer development times. Sphere hosted ISV solutions are easy to set up and require minimal developer resources. Our solutions are customizable, ensuring branding continuity and a seamless user experience.

You can easily add merchant services capability as well. With our frictionless, online merchant application, it is convenient and effortless.

Because Sphere is a gateway and merchant services provider, we are your single source for payments, reducing moving parts and avoiding potential points of interference.

Supports Validated P2PE

You don't have to become a payments and compliance expert when adding payments to the mix. Our expert and robust solutions are designed to meet the requirements of PCI guidelines and reduce your risk by keeping sensitive card data off your servers and networks.

Features include:

- Support for validated Point to Point Encryption
- Tokenization for recurring and subscription payments
- Velocity controls to reduce fraudulent activity
- Recaptcha

Sphere provides a true Multi-Channel solution and one of the simplest integrations on the market.

The Payments Solution that Pays You Back

Integrate our payments solutions and expertise to your platform, and we can power results that work for everyone. When you partner with Sphere, you'll benefit from revenue sharing, in addition to Tier 1 support. 24/7/365 technical customer support and ongoing, in-house, white-glove service are always available.

- ✓ Easy to integrate, minimal development resources
- ✓ Full sandbox environment with sample code assistance
- ✓ Simple, automated onboarding
- ✓ Robust revenue share to capitalize on payments
