

TC Trustee® Premier for Epic MyChart and MyChart Mobile

Secure online payment acceptance through MyChart.

TC Trustee® Premier provides secure patient payment acceptance, reduced PCI scope, flexibility, and branding continuity all seamlessly integrated with Epic MyChart and MyChart Mobile.

Collect Patient Payments Easily and Securely

TC Trustee® Premier is integrated with Epic MyChart and MyChart Mobile allowing Epic community members to accept online patient and e-visit payments securely by keeping payment data out of the healthcare organization's web server.

To help minimize the burden to achieve PCI compliance, TC Trustee Premier's use of the Epic External Payment Page integration allows MyChart websites to collect payments in real time while keeping sensitive data from passing through MyChart servers. This is handled by embedding TC Trustee Premier within MyChart and MyChart Mobile

to handle the collection of the payment details.

The integration with Epic External Payment Page is available in MyChart and MyChart Mobile credit card functionality and workflows, including tokenization, automatic payment plans, and Guest Pay for versions of Epic 2017 and newer.

Reduce PCI Scope

MyChart combined with TC Trustee Premier eliminates the need for healthcare organizations to capture, transmit, or store sensitive payment information, which greatly reduces their PCI scope. Moreover, the TC Trustee Premier interface with Epic is entirely transparent: the patient experience is seamless.

Branding Continuity

Designed for i-Frame, modal windows, or standalone pages, payment pages are designed to be mobile-friendly/responsive providing the ability to scale automatically for desktop, tablet and mobile use.

TC Trustee Premier seamlessly matches client's specific style and/or CSS providing a consistent, uninterrupted checkout experience.

Configuration Options

The many configurable features include:

- » Accept credit, debit and bank payments.
- » Store patients cards and bank account information on file as tokens to speed the payment process for subsequent use.
- » Collect billing address and conduct Address Verifications (AVS).
- » Perform account verification when storing tokens.
- » Save custom data with each transaction for use with custom reporting.
- » Customize your 'look and feel'.
- » Responsive layout accommodates desktop, mobile and MyChart Guest Pay functions.

Use with Epic and Non-Epic Payments

Your TC Trustee Premier payment page can also be used for foundations/donations, recurring payments, and other online payments outside of MyChart.
