

Satin Stitches has found a great product that we want to share with you. It is called **FRESH AGAIN®**.

Do you have stinky costumes/uniforms in your closet?

We have found a product that seems to be safe on all types of high quality performance wear that Satin Stitches creates. When your costume/uniform is stinky, all you do is spray the inside of the garment and the smell disappears.

**FRESH AGAIN® Uniform & Costume Deodorant Spray** is an odor neutralizer – NOT a fragrance, nor a “cover” for offensive odor. By converting gaseous odor-producing molecules to a solid, **FRESH AGAIN®** chemically cancels perspiration odors when applied to garments. No gas = no odor!

Using **FRESH AGAIN®** after every wearing:

- Keeps garments fresh and odor-free
- Reduces cleaning costs
- Extends the life of the garment

We all know that performers perspire. And since Satin Stitches recommends laundering as little as possible, **FRESH AGAIN®** is great product to try. In many cases, your costumes/uniforms are not dirty – they just smell bad! Using **FRESH AGAIN®** will eliminate the odor and stop the need to launder your costumes/uniforms as often.

Dry-cleaning does not remove perspiration – it actually sets it in. But now you can dispel those perspiration odors everyday – instantly – simply by spraying the affected areas of uniforms or costumes with **FRESH AGAIN®!** By neutralizing the perspiration itself, **FRESH AGAIN®** prevents the damaging effect perspiration can have. Using **FRESH AGAIN®** before dry-cleaning permits total cleaning.

Satin Stitches is making it very easy to get this product. You can buy it directly from us. Don't worry, we charge the same prices as ordering it from the company directly. This way you do not have to worry about minimum orders or dealing with a new company. And your costumes/uniforms can be **FRESH AGAIN®!**
