

Specialty Technical Publishers (STP) and Specialty Technical Consultants (STC) Publish Environmental, Health & Safety (EHS) Audit Protocol for Malaysia

Latest EHS Regulations Updates Assist Companies to Achieve EHS Compliance

VANCOUVER, B.C. ([PRWEB](#)) March 05, 2019 -- Specialty Technical Publishers (STP) and Specialty Technical Consultants (STC) announce the availability of the newly updated International Audit Protocol Consortium (IAPC) EHS audit protocol for [Malaysia](#). Leading companies around the world use IAPC EHS audit protocols to understand the scope of their EHS regulatory obligations and rapidly collect, share, archive, and export audit findings in a cost effective manner. IAPC EHS audit protocols are now prepared by STC in partnership with STP and continue to focus on those national (plus, in some cases, regional or provincial) EHS requirements that have site-specific application for manufacturing operations. As a leading EHS management consulting firm with a global network of experienced EHS teaming partners, STC has indepth knowledge and technical expertise of local/regional EHS requirements.

STP and STC maintain leading-edge EHS audit protocols for more than 50 jurisdictions. The protocol documents are written in English and are available in MS Word, Adobe Acrobat and Excel formats, as well as through STP's web-based portal or can be integrated into an existing company platform. Using the protocols' custom templates and advanced functionality features, auditors can easily track audit findings and manage data over time to improve compliance, risk management and safety performance. In addition, STP's formatting is compatible with leading risk management and sustainability platform providers.

Highlights of selected legislation covered in the newly developed protocol include:

- The amended "Solid Waste and Public Cleansing Management (Scheme for Household Solid Waste and Solid Waste Similar to Household Solid Waste) (Amendment) Regulations 2016" was added to the protocol including requirements relating to the management of recycled wastes.
- "Solid Waste and Public Cleansing Management (Scheme for Commercial, Industrial and Institutional Solid Waste) Regulations 2018" was added to the protocol including requirements relating to the selection of a waste collection licensee and the record keeping requirement for any commercial, industrial or institutional solid waste generator.
- The "Code of Practice on Prevention and Eradication of Drug, Alcohol and Substance Abuse in the Workplace 2005" was added to the protocol including information that directs the user to details on the implementation of a drug, alcohol, and substance abuse policy.
- The license application form for licenses required under the "Environmental Quality (Licensing) Regulations, 1977, P.U. (A) 198/1977" was added to the protocol. This regulation provides the form that companies must use to apply for any license or license transfer or license renewal in application of the requirements of the "Environmental Quality Act of 1974, Act 127."
