- **Play a variety of instruments**
- **Make their own instruments**
- **Play music solo & in groups**
- **Dance, move, and perform!**
- **Take private lessons on instrument of their choice!**
- **Make new friends**

What to Expect

Elementary aged students can now be a part of RealJams Academy! Juniors is a fun-filled week of music immersion where students will develop their musical skills through dynamic and creative activities! Activities include instrument making, ensemble playing, and even private lessons! Students will connect music with movement through body percussion compositions, high energy dance, and exploring musical expression with the help of percussion instruments, parachutes, and more! Each day students will work on developing and creating pieces of music which will be performed on our RealRoom stage at weeks end. They will perform fun arrangements of songs where everyone is singing, playing, and showing off their new skills. There’s no better way for kids to prepare for joining their first band!

Half day program for ages 5-6

Students will get to experience ensemble playing with their friends through jamming on percussion instruments. Using everyday items, students build their own instruments to use in our performance at the end of the week, then take home to keep! Through instrument making, students will also learn how the instruments used in modern music make their sound.

Full day program for ages 7-9

In addition to joining an ensemble, making instruments, and participating in music and movement classes, students ages 7-9 will take a week of daily private lessons on the instruments of their choice! Choose from instruments like: ukulele, drums, piano, or singing! The full day program also includes percussion ensemble and introduction to the recorder — which students will be able to keep at the end of the week!
