

BerniePortal

August 2018 Release Notes

Feature Admin Visibility:

- a. Feature Admins are named by the Employer's Global Admin, and have administrative capabilities restricted to certain Features of BerniePortal and/or with respect to certain Subgroups of Employees.
- b. Historically, a Feature Admin had the ability to view all data about any Employee who was in a Subgroup over which the Feature Admin had been given administrative capabilities.
- c. With this update, Employer Global Admins can restrict the data visibility given to Feature Admins so that Feature Admins cannot see either SSNs or Salaries or both.
