PTO Tracking

Optimize time tracking and time off management.
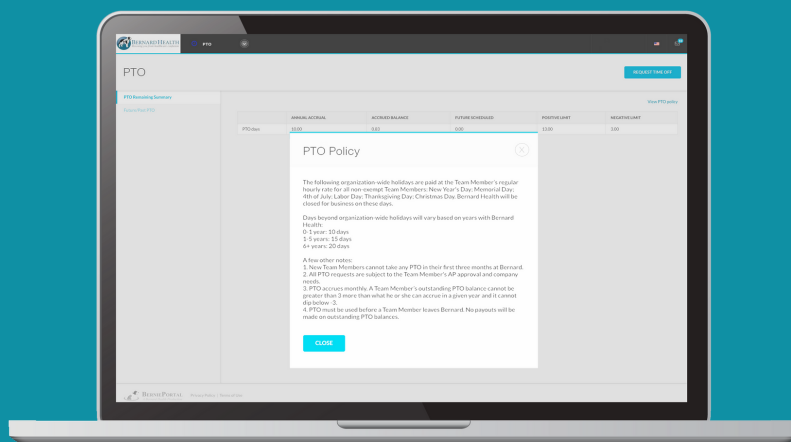

Streamline Requests & Approvals

Allow employees to request PTO directly from their BerniePortal accounts. A notification will be sent to the employer for review. If approved, the paid time off can be viewed in the employee's profile.

Allow Employee Self-service

Provide employees with the tools to self-manage PTO. Using BerniePortal PTO, employees can track accrual balance, request time off and edit or cancel requests. Notify employees when the request is approved or denied without leaving your chair.

Customizable Time Off

Need to accommodate multiple PTO plans? No problem. BerniePortal PTO Tracking allows you to implement multiple PTO plans. Not only can you track these plans, you can also segment plans by holiday, floating days, sick day, vacation days and personal days.
