

BerniePortal

June 2018 Release Notes

Four areas of improvement:

1 Cleaned up Employer Integrations area

- a. More and more payroll companies and benefit providers are integrating with BerniePortal.
- b. We improved the Employer integrations area so that they are better organized for the Employer.

2 Insurance company page

- a. Brokers have wanted easy-to-access information from carriers that offer BernieBill.
- b. You now have it from within your own login area.

3 Hiring from within the Applicant Tracking System

- a. HR wanted to be able to hire an employee from directly within the Applicant Tracking area (rather than from within Onboarding).
- b. HR can now do this, improving upon what is already the industry's only seamless process from candidate to hire to enrolled in benefits.

4 New benefit type: Identity Theft

- a. Identity Theft is an increasing popular and important benefit.
- b. It is now available as a standard Benefit Type option (had been available before by using the custom label function, but now it is available as a standard option).
