

# Billing

Generate carrier bills directly from BerniePortal.

## Generate Bills

Generate, audit and download bills as a PDF. Current and past bills will always be kept on record and available for viewing at anytime.

## Track Subgroups

Billing subgroups allows you to view costs by subgroup and location. From here, a report is produced showing a breakdown of benefit costs associated with each subgroup.

## Save Time

Bernie Billing allows employers to adjust bills in real-time from their benefit providers. This provides a more accurate and timely billing process, a smaller chance for errors and real-time edits.

## Select Carriers

The benefit providers that are part of Bernie Billing agreed to issue their bills via BerniePortal. BerniePortal already knows which employees enrolled in which benefits, what the premiums are, and when the coverage was effective
