Time & Attendance

Keep better track of employees' weekly hours and remove the stress and hassle from paperwork with the BerniePortal time & attendance feature.

Clock In & Out

The BerniePortal dashboard contains easy to read clock in and out buttons. The time panel shows how many hours have been worked, how many hours are left of the 40 hour work week, and even overtime hours.

Manage Timesheets

The timesheet shows the exact times your employees have clocked in and out each day, as well as a running total of the hours worked. Employees can request edits to their time sheets and a notification will be sent to their Approver. No paperwork to fill out and turn it!

Download the iPhone App

Clock in and out, edit, or put in requests from any location using the BerniePortal iPhone app. The dashboard, timesheets, request and edit pages are all available via the iPhone app.
