

# iPhone App

BerniePortal has launched an iOS app that will supply important HR information including insurance details, clock in and out, and even new hire onboarding.

## Simplify Onboarding

Complete the entire onboarding process using your iPhone or iPad. Sign documents using your fingertip.

## Check Notices

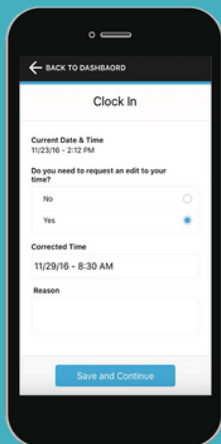

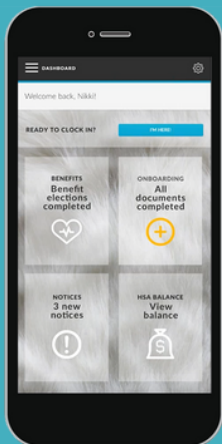

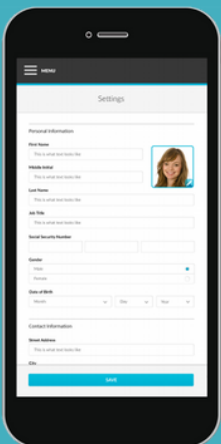

View notices and attachments anywhere and sign them as needed. For example, if a company adapts a new security policy, employees can view the notice and sign right from their phones.

## View Benefits

Elected benefits and summaries are also available on the go. Users can reference the cost of their plans or check their HSA balance right from their iOS device.

## Clock In & Out

Clock in and out, edit, or put in requests from any location. The dashboard, timesheets, request and edit pages are all available via the BerniePortal iPhone app.
