

Join Veristat Taipei

Veristat is expanding our global footprint, from our home office in Boston, up to Canada, down to RTP, and over to Taipei.

We recently expanded our operations into Taiwan to support growing client demand for Clinical Trial, Biostatistics, and Programming excellence in the region.

We do things differently than large CROs. Do you value scientific integrity and a collaborative team environment? If so, you will feel right at home here with dedicated opportunities to discuss your achievements and grow your career through quarterly feedback conversations.

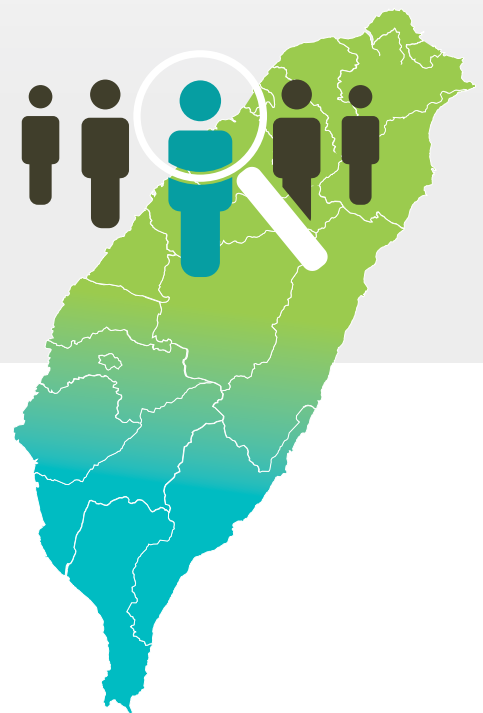

We are actively seeking experienced SAS Programmers as we grow our Taipei operations. Our SAS programmers are a critical foundation for supporting the fast-growing clinical development market in Taiwan and regulatory submission programs for both local and global sponsors.

We are looking for:

[SAS Programmer](#)

[SAS Programmer II](#)

[Senior SAS Programmer](#)

We invite you to learn more about Veristat at www.veristat.com
