

Eisenmann receives order from INEOS Styrolution for exhaust gas treatment of new ASA plant

Crystal Lake – 6/17/2019 Eisenmann Corporation is delighted to receive an order from **INEOS Styrolution**, who is working with engineering company **Worley**.

Eisenmann will supply a technical solution for exhaust gas treatment utilizing the VRTO-C and RCU technologies coupled with SCR (selective catalytic reduction of nitrogen oxide), scrubber and other equipment such as a hot gas bypass and redundancy systems.

The project is driven by a need for reliable performance, operations and environmental controls including limits on VOCs, NH3 and NOx.

About EISENMANN Corporation

Eisenmann is a leading international supplier for environmental, renewable energy and manufacturing systems combined with 40+ years of experience in designing, building, commissioning and servicing systems in North America. Eisenmann solves environmental challenges and enables processes of the future through innovative application technologies for air abatement, waste disposal and recycling, waste water treatment as well as ammunition disposal.
