

LAKELAND CLEANMAX® FEATURES & BENEFITS

CLEAN MANUFACTURED GARMENTS. Garments that are clean manufactured offer significantly less particle counts in contrast to garments that are not clean manufactured.

FOLDED FOR EASIER DONNING. Garments are folded to minimize excursions during donning and doffing; and prevent surface contamination.

SMOOTH STORM FLAP FOR ADDED LEVEL OF PROTECTION. Very few disposable cleanroom garments have the added protection of a placket storm flap. Covering the zipper further protects the critical chest and front area of the garment from potential particulate breakthrough.

CHEMICAL PENETRATION RESISTANCE. CleanMax® offers chemical penetration resistance to oils, bleach and 50 percent sodium hydroxide.

THUMBLOOPS. Elastic wrists with thumb loops help secure the coveralls and frocks in place to prevent the potential exposure of skin while worn during normal activities.

RESISTANCE TO BLOOD BORNE PATHOGENS AND MORE. Get the added safety of CleanMax®, which offers resistance to blood and body fluid penetration, viral penetration and blood borne pathogens.

ALL BOUND SEAMS. CleanMax® garments feature bound seams, which are precisely sewn with an additional outer binding. This increases seam strength and provides a better barrier from break through and protection from strike through than simple serged seams.

LESS WRINKLES, MEAN LESS EXCURSIONS. Garments are individually packaged and expertly folded to prevent excessive wrinkling and the potential for increased excursions.

SMOOTH SURFACE AREA PREVENTS PARTICLES FROM STICKING. CleanMax® garments are smoother than other leading brands, which means particulates are less likely to harbor on the garment surface.

CUFFED ANKLE ALLOWS FOR SIX INCHES OF FREEDOM. Expertly folded to reduce surface contamination during the donning process, the cuffed ankle provides six inches of freedom when you are stepping into the gown.
