CLOUD TO CLOUD RECOVERY

Powered by Nutanix

Achieve IT Resilience with Disaster Recovery Automation for Diverse Environments

TierPoint's Cloud to Cloud Recovery (DRaaS) solutions flexibly fit your unique mix of recovery time objective (RTO), recovery point objective (RPO), production environment, and recovery environment requirements. Automation provides peace of mind. Your organization can test your DR solution anytime, quickly recover from a cyberthreat or outage into an enterprise-class recovery environment and use your recovery environment for as long as you want.

Businesses depend on data, applications and infrastructure, so data backup alone is not enough. Cloud-based disaster recovery is among the fastest-growing cloud services, and DRaaS enables recovery of your data, applications and infrastructure – all within minutes. You can achieve more control over your recovery plan, replication, and failover with TierPoint DRaaS.

High-Availability Cloud to Cloud Recovery

TierPoint's customized cloud-to-cloud recovery solutions powered by Nutanix's native DR technologies protect your virtualized workloads and offer a variety of configurations with failover to a Nutanix private cloud for a secure and dedicated recovery environment. We support our clients with a 99.99% uptime availability SLA for private cloud infrastructure plus an industry-leading SLA of 100% uptime for data center infrastructure components including HVAC and power systems and managed bandwidth with redundant connections.

Enterprise-Class Recovery

Automated replication protects your virtualized production environments and DR orchestration allows for rapid failover to TierPoint hosted private cloud powered by Nutanix. Use your cloud-based recovery environment as little or as much as you like, and for as long as you need.

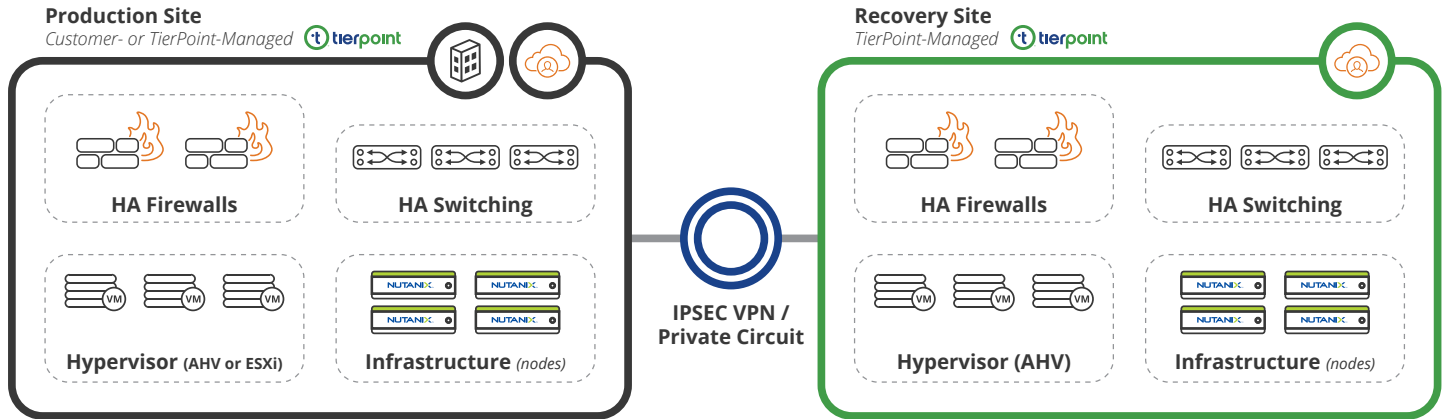

Secure and Compliant

Cloud environments hosted in TierPoint data centers benefit from the best-practice physical security and compliance enforced in all our facilities. Non-disruptive testing and reporting helps satisfy PCI, HIPAA and more. TierPoint can also help safeguard every layer within your environment with IT security services.

Managed DR Solution

Managed services deliver best-in-class technology and certified DR experts while freeing your IT staff for strategic projects. Our experts will manage the recovery environment and DR orchestration for you. TierPoint is the top Nutanix-certified service provider.

Meet Your Recovery Objectives

Whether you need granular or less frequent sync points, or a range of recovery timelines your TierPoint recovery team will create a DRaaS recovery solution that reduces complexity, minimizes data loss and downtime, and fits your unique requirements and budget.

Your Expert Partner

Beyond cloud-to-cloud recovery, TierPoint’s highly experienced IT professionals deliver a full set of disaster recovery services, including Azure Site Recovery, server-to-cloud recovery, recovery for IBM and Oracle systems, and backup services. TierPoint also provides cloud, colocation, networking, security, and managed IT services.

“The solution provided by TierPoint was exactly what I needed. I struggled for years failing audits for not having offsite storage of backups and a DR plan. Their product resolved all of my issues, including having the ability to do non-intrusive DR testing.”
