

INTEGRATION FACT SHEET

Veracross

Supported versions of SIS	V1 of the API. We will support V2 in December 2016.
Single sign-on	Supported
<ul style="list-style-type: none"> • How does it work? 	See diagram below
<ul style="list-style-type: none"> • Data needed 	Via API: Vendor Key, First Name, Last Name, Date of Birth, Associated Relationships, Tracker
Data exchange	Yes, via API
<ul style="list-style-type: none"> • Synced fields 	<p>Student demographic data: First Name, Last Name, Middle Name, DOB, Tracker, Gender</p> <p>Parent demographic data: First Name, Middle Name, Last Name, Gender, Address, Email, Home/Cell/Work Phone</p>
<ul style="list-style-type: none"> • Emergency contact data? 	Parent/Guardian contacts will sync via the API. All Emergency contacts are entered by end user. Limit of 7 total contacts per student.
How is it set up?	Client must request their School ID from Veracross, and provide that, along with a Username/Password with access to API & URL for Veracross instance to Magnus. Magnus will then use those details to configure the account and turn on the integration.

User visits a school-specific Magnus link (provided by Magnus). User enters Veracross username/password.

Magnus validates information via request to Veracross API.

Magnus checks user exists and loads charts.
