

# MARS®

## Simplify Your Appraisal Reviews & Maximize Staff Efficiency

There is a way to automate appraisal reviews in today's complex and regulated environment and free you from the burden of these grueling manual tasks - giving you the security, consistency and compliance you need. Global DMS' MARS (MISMO Appraisal Review System) is an ultramodern technology that not only mitigates an ever-growing list of rules, but also promotes the timely completion of appraisal reports through automation.

A standard component of EVO-Res™, MARS quickly analyzes an appraisal for completeness, consistency, and compliance with all GSE guidelines, USPAP, UAD, and industry best-practice – providing robust reviews in seconds that are easily managed from a simple dashboard.

MARS has over 3,600 standard business rules that you can run your loans against, and it's configurable, allowing you to add rules that suit your business model and needs.

Implementing this upfront quality control engine helps your business level-up by significantly reducing internal review times. MARS instantly directs reviewers to the areas of the appraisal that need their attention and provides clear directives on a resolution, all automatically, so your staff can focus on appraisal reports that show a potential problem, rather than touching every loan manually.

If you are looking for a solution to manage your risk and quickly review each appraisal in a complete, accurate and consistent way, contact us for a demo.

### Why Choose MARS?

- ☑ 100% Configurable Set-up - choose what you want to use without the need of support tickets and delays
- ☑ Unlimited Custom Rule Sets
- ☑ Supports MISMO XML and PDF formats
- ☑ Rule Severity and Weighting Support
- ☑ Instant Red Flag Report with Collateral Score
- ☑ Appraiser License Validation
- ☑ Subject Property Aerial Map
