

# HealthPRO® Heritage “PDPM Profiler” The Optimal Clinical Tool

A collaborative, customizable process for your IDT

- Prioritize the role of the clinician in care planning & completion of the MDS
- No need to rely on automated tool/technology to “do the hard work”
- Invest in education
- Implement necessary work flow processes
- Trust in & leverage the strength of your teams

The form is titled "PDPM Patient Profile" and includes fields for Name, Physician, Referral Source, Admission Date, and Eligibility Verification. It also has sections for Hospital Admission Date, Prior Living Arrangements and Functioning, Hospital Diagnoses, and a list of surgeries. A table titled "Section GG Item" has columns for Therapy, Nursing, and MDS, with rows for Transfers Average, Bed Mobility Average, Walking Average, Eating, Toileting Hygiene, Oral Hygiene, and PDPM Total Score. Below the table are fields for Functional Score Admit, IPA, and DC. There is also a section for Admission Performance with a timeline from 05.06 to 01.07.09.88 and a Function Score scale from 4 to 0. A section for SLP (Speech-Language Pathology) includes checkboxes for various conditions and services.

## No Shortcuts On the Road to PDPM Success

- Projects a Resident’s PDPM CMGs
- Dashboard Reporting System to track/optimize coding & outcomes
- More sensitive/accurate than technology solutions
- Not a one-sized-fits-all tool & is EMR system-agnostic
- Integrate as part of the new Triple Check Process
- Pre-transmission Review Resource: Comparison between Preadmission Screening & 5-Day Scheduled Assessment
