HERITAGE

Introducing: The PDPM Profiler

The Optimal Approach: A collaborative, customizable process for your IDT

- Prioritize the role of the clinician in care planning & completion of the MDS
- Resist temptation to rely on automated tool/technology to “do the hard work”
- Invest in education
- Implement necessary work flow processes
- Trust in & leverage the strength of your teams

Dashboard Reporting System to track/optimize coding & outcomes

More sensitive/accurate than technology solutions

Not a one-sized-fits-all tool & is EMR system-agnostic

Pre-Transmission Review Resource allows comparison between Preadmission Screening & 5-Day Scheduled Assessment

Integrate as part of the new Triple Check Process
