

5 MINUTE GUIDE AS9100D OVERVIEW

AS9100:2016 (or AS9100D) is a QMS standard for the aerospace industry, released Sep., 2016 by the International Aerospace Quality Group (IAQG). Note that all AS9100C certificates will expire Sep. 14, 2018. Below we provide an overview of what manufacturers should know about the standard:

Key Changes

Product Safety

Addition of clause and references

Counterfeit Parts Prevention

Added clause and references

Risk-Based Thinking

Merged current 9100 with the new ISO requirements; emphasis on risks in operational processes

Process Approach

Greater emphasis on how processes are integrated with the QMS

Knowledge Management

Newly introduced concept

Awareness

Individual contribution to quality

Human Factors

Now considered as part of nonconformities and corrective actions

Configuration Management

Clarifications and improvements made to address stakeholder needs
