1. DESCRIPTION OF BUSINESS

Posera Ltd. (formerly Posera-HDX Limited) ("Posera", or the "Company"), is domiciled in Canada and is in the business of managing merchant transactions with consumers and facilitating payments emphasizing transaction speed, simplicity and accuracy. Posera develops and deploys touch screen point-of-sale ("POS") system software and associated enterprise management tools and has developed and deployed numerous POS applications. Posera also provides system hardware integration services, merchant staff training, system installation services, distribution of electronic cash registers to a network of value added resellers across Canada and post-sale software, known as Maitre'D, throughout the Americas, Europe & Asia. Finally, the Company has added to its suite of product offerings by offering debit and credit card merchant processing, services, and POS integration.

Posera was founded in 2001 and is headquartered at 350 Bay Street, Suite 700, in Toronto, Canada M5H 2S6. The Company's common shares ("Common Shares") are listed on the Toronto Stock Exchange under the symbol "PAY", and previously "HDX".

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation

These condensed consolidated interim financial statements have been prepared in accordance with IFRS applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting. These condensed consolidated interim financial statements do not include all of the information required for full annual financial statements prepared in accordance with IFRS. As such, these condensed consolidated interim financial statements should be read in conjunction with the Company's annual financial statements for the year-ended December 31, 2015. These condensed consolidated interim financial statements were approved for issue by the Board of Directors on May 11, 2016.

The preparation of interim financial statements in conformity with IAS 34 requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. These condensed consolidated interim financial statements have been prepared on the historical cost basis, except for certain held for trading financial instruments, which are carried at fair market values.

The accounting policies applied in these condensed consolidated interim financial statements are based on IFRS effective for the year-ended December 31, 2016, as issued and outstanding as of the date the Board of Directors approved these statements. The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company's annual consolidated financial statements for the year-ended December 31, 2015, except as described below.

The results for the three-months ended March 31, 2016 are not necessarily indicative of the results to be expected for the full year.

Consolidation

These consolidated financial statements include the accounts of Posera Ltd. and its wholly owned subsidiaries. These subsidiaries are A&A Point of Sale Solutions Inc. ("A&A"); Posera Inc. and its subsidiaries: Posera France SAS; Posera Europe Ltd.; Posera Software Inc.; and Posera USA Inc. (collectively referred to as "Posera Inc."); HDX Payment Processing Ltd. ("HDX-PP"); Zomaron Inc. ("Zomaron") and Terminal Management Concepts Ltd. ("TMC").

Subsidiaries are those entities (including special purpose entities) over which the Company has the power to govern financial and operating policies. Subsidiaries are fully consolidated from the date on which control is obtained and are de-consolidated from the date that control ceases. Intercompany transactions, balances, income and expenditures, and gains and losses are eliminated.

Presentation Currency

These consolidated financial statements are presented in Canadian Dollars ("CAD").

Foreign Currency Translation

The functional currencies of all consolidated entities are CAD, with the exception of Posera Inc. and certain of its subsidiaries, which have functional currencies of the United States Dollar ("USD") (Posera Inc. and Posera USA Inc.), the British Pound ("GBP") (Posera Europe Ltd.) and the Euro (Posera France SAS). The Company translates the assets and liabilities of consolidated entities with differing functional currencies to CAD at the rate of exchange prevailing at the statement of financial position date and revenues and expenses of those operations using the average rates of exchange during the period. Gains and losses resulting from this translation are recorded in accumulated other comprehensive income (loss), a component of shareholders' equity.

Foreign Currency Transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation at exchange rates of monetary assets and liabilities denominated in currencies other than an entities' functional currency are recognized in the consolidated statements of operations, except for gains and losses resulting from intercompany balances included in the net investment in foreign operations, for which foreign exchange gains and losses are recorded in accumulated other comprehensive income (loss).

Segments

The Company has organized its business around different products and services. Each acquired business is a separate operating segment. The Company then aggregates the operating segments into reportable segments based on the similarities of the products and services that are offered to its customers, the types of customers that products and services are provided to, and the methods used to distribute products and provide services. The chief decision maker of the company was determined to be the Company's Chief Executive Officer (the "CEO"), and as such the Company determined its reportable segments based upon the reports the chief decision maker utilized to evaluate performance and allocate resources. Revenues from external customers are geographically allocated to countries based upon the place where the customers are located.

Business Combinations

Business combinations have been accounted for in accordance with IFRS 3, Business Combinations ("IFRS 3"), whereby acquisitions of subsidiaries and businesses are accounted for using the purchase method. The cost of the business combination is measured as the aggregate of the fair values (at the acquisition date) of assets given, liabilities incurred or assumed, contingent consideration and equity instruments issued by the Company in exchange for control of the acquiree. Acquisition related costs are expensed as incurred, except for incremental costs of issuance of debt or equity instruments. The acquired identifiable assets and liabilities are recognized at their fair values at the acquisition date. Goodwill arising on acquisition is recognized as an asset and initially measured at cost, being the excess of the cost of the business combination over the Company's interest in the net fair value of the identifiable assets acquired and liabilities assumed.

If the Company's interest in the net fair value of the acquired identifiable assets and liabilities exceeds the cost of the business combination, the excess is recognized immediately as a bargain purchase gain in the consolidated statements of operations.

Subsequent to initial recognition, measurement of contingent consideration depends on whether it is an equity instrument or a financial asset or liability. Subsequent changes in the fair value of the contingent consideration that is deemed to be a financial asset or liability is recognized in the statement of operations as a gain or loss. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

Convertible debentures

The Company classifies a financial instrument, or its component parts, on initial recognition as a financial liability or an equity instrument in accordance with the contractual arrangement's substance, and applicable IFRS standards. If the IFRS equity classification criteria are met, the Company allocates the total face value of the convertible debenture by estimating the fair-value of the note payable component in isolation, and allocating the residual to the conversion option presented as equity. If the IFRS equity classification criteria are not met, the Company allocates the total face value of by determining the fair value of the conversion option presented as a derivative liability in isolation, with the residual being allocated to the note payable.

Financing - Transaction Costs

Incremental costs incurred in respect of raising capital or debt are charged against the equity or debt proceeds raised, unless the instrument to which the transaction costs relate is classified as fair value through profit and loss in which case the incremental costs are expensed in the Statements of Operations immediately.

Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable for the gross inflow of economic benefits during the period, arising in the ordinary course of the Company's activities. The Company offers certain arrangements whereby a customer can purchase products and services together. Where such multiple element arrangements exist, the amount of revenue is allocated to each element based upon the relative fair values of the various elements. The fair values of each element are determined based on the current market price of each of the elements sold separately.

The Company derives revenues from the following sources:

- a) Revenue from POS systems, digital video recording ("DVR") systems and POS parts and consumables is recognized when the Company has transferred to the customer the significant risks and rewards of ownership, the Company does not retain continuing managerial involvement with or effective control of the goods, the amount of revenue can be measured reliably, it is probable the economic benefits associated with the sale will flow to the Company and the costs incurred or to be incurred in respect of the transaction can be measured reliably. These conditions are generally met when the product has been installed. POS and DVR systems generally include a one-year support contract. The Company allocates revenue to each component of the transaction using the relative fair value of each separately identifiable component. The Company defers the fair value of the support services under the agreement, as deferred revenue at the time of sale. Revenue on the support services is then recognized in line with the customer support contract policy below.
- b) Revenue from customer support contracts is deferred and recognized as revenue on a straightline basis over the term of the contract.
- c) Software development and hosting service revenue are accounted for as services. Revenue is recognized when the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the transaction will flow to the entity, the stage of completion of the transaction at the end of the reporting period can be measured reliably and the costs incurred for the transaction and the costs to complete the transaction can be measured reliably. Generally, unless a more accurate measure of the stage of completion is available, Software development and hosting service revenue is recognized on a straight-line basis over the term of the contract.
- d) Services revenue relates to the delivery of consulting and system integration services with revenue recognized upon delivery and acceptance by the customer.

- e) Software perpetual licenses are accounted for as sales of products as the customer has a perpetual right to use the software freely and the Company has no remaining obligations to perform after delivery of the software. The revenue from these products is recognized when the Company has transferred to the customer the significant risks and rewards of ownership of the software, the Company does not retain continuing managerial involvement with or effective control over the software, the amount of revenue can be measured reliably, it is probable the economic benefits associated with the sale will flow to the Company and the costs incurred or to be incurred in respect of the transaction can be measured reliably. These conditions generally are met when the application software has been delivered.
- f) Revenue from processing transactions is recognized at the time the transactions are processed

The Company has presented the revenues segmented into POS Revenues and Payment Processing Revenues. POS Revenues are those revenues earned primarily from the sale, service of POS terminal hardware and software and Payment Processing Hardware, such as Debit/Credit Card pin-pads and ATMs; whereas Payment Processing Revenues are those revenues earned from primarily the associated payment processing transactions.

Assets and Disposal Groups Held for Sale or Distribution

Non-current assets, or disposal groups comprising assets and liabilities, that are expected to be recovered primarily through sale or distribution rather than through continuing use, are classified as held for sale or distribution. Immediately before classification as held for sale or distribution, the assets, or components of a disposal group, are remeasured in accordance with the Company's accounting policies. Thereafter the assets, or disposal group, are measured at the lower of their carrying amount and fair value less costs to sell. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on a pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, employee benefit assets, investment property or biological assets, which continue to be measured in accordance with the Company's accounting policies. Impairment losses on initial classification as held for sale or distribution and subsequent gains and losses on remeasurement are recognised in profit or loss. Gains are not recognized in excess of any cumulative impairment loss.

Once classified as held for sale or distribution, intangible assets and property, plant and equipment are no longer amortised or depreciated, and any equity-accounted investee is no longer equity accounted.

Discontinued Operations

Classification as a discontinued operation occurs on disposal or when the operation meets the criteria to be classified as held for sale, if earlier. When an operation is classified as a discontinued operation, the comparative Consolidated Statements of Operations and Comprehensive Income is represented in a format as if the operation had been discontinued from the start of the comparative period.

The Company presents the Results from Discontinued Operations as one net amount on the Consolidated Statements of Operations and Comprehensive Income.

IFRS standards issued but not yet effective

Standards issued but not yet effective or amended up to the date of issuance of the Company's consolidated financial statements are listed below. This listing is of standards and interpretations issued, which the Company reasonably expects to be applicable at a future date. The Company has not determined if they will early adopt any standards at this time.

- In November 2009, the IASB issued IFRS 9 as part of its plan to replace IAS 39, Financial Instruments: Recognition and Measurement (IAS 39). IFRS 9 requires financial assets, including hybrid contracts, to be measured at either fair value or amortized cost. In October 2010, the IASB added to IFRS 9 the requirements for classification and measurement of financial liabilities previously included in IAS 39. In November 2013, the IASB introduced a new hedge accounting model, and allowed early adoption of the own credit provisions of IFRS 9. The final version of IFRS 9 was issued in July 2014 and includes (i) a third measurement category for financial assets fair value through other comprehensive income; (ii) a single, forward-looking 'expected loss' impairment model, and (iii) a mandatory effective date for IFRS 9 of annual periods beginning on or after January 1, 2018. The Company is evaluating the impact of adopting this new standard.
- ii) IFRS 15 Revenue from contracts with customers, is a new standard on revenue recognition, superseding IAS 18, *Revenue*, and IAS 11, *Construction Contracts* and related interpretations. Effective for first interim periods within years beginning on/after January 1, 2018. The Company is evaluating the impact of adopting this new standard.

3. INVESTMENT CREDITS AND INVESTMENT TAX CREDITS RECEIVABLE

Investment tax credits related to Scientific Research and Experimental Design and investment credits related to Electronic Business, were recorded in the consolidated interim statements of operations as a reduction (increase) in technology expenses in the amount of \$109,130 during the three-months ended March 31, 2015 (2015 - \$91,003) respectively. As of March 31, 2016, a subsidiary of the Company has refundable investment tax credits receivable totaling \$281,561 (December 31, 2015 - \$186,999), and non-refundable investment credits receivable totaling \$834,039 (December 31, 2015 - \$819,986) which expire according to the schedule below:

	March 31, 2016	December 31, 2015
2030	94,198	\$ 94,198
2031	288,103	288,103

(b) Stock options and stock-based compensation

Since 2002, the Company has had a stock option plan ("the Old Plan") to encourage ownership of the Company's Common Shares by its key officers, directors, employees and consultants. The maximum number of Common Shares that may be reserved for issue under the Old Plan is 2,000,000 Common Shares. Options under the Old Plan vest over various periods from the date of the granting of the option. All options granted under the Old Plan that have not been exercised within ten years of the grant will expire, subject to earlier termination if the optionee ceases to be an officer, director, employee or consultant of the Company. The majority of options granted under the Old Plan were granted to former executives of the Company.

On September 20, 2011, the shareholders of the Company approved a new stock option plan (the "Plan"). The Plan has a rolling maximum number of Common Shares that may be issued upon the exercise of stock options, but shall not exceed 10% of the issued and outstanding Common Shares at the time of grant. Any increase in the total number of issued and outstanding Common Shares will result in an increase in the available number of options issuable under the Plan, and any exercises of options will make new grants available under the Plan. Options under the Plan vest over various periods from the date of the granting of the option. All options granted under the Plan that have not been exercised within ten years of the grant will expire, subject to earlier termination if the optionee ceases to be an officer, director, employee or consultant of the Company. The Plan was established on July 31, 2007, reapproved on June 18, 2014, and was enacted to encourage ownership of the Company's Common Shares by its key officers, directors, employees and consultants.

The Company does not have any current intention to convert the options outstanding under the Old Plan into options under the Plan. The Company intends to maintain the Old Plan in place until all outstanding options under the Old Plan are exercised or have expired, at which time the Old Plan will terminate. The Company will not grant any new options under the Old Plan.

The following is a summary of the stock options granted and changes for the periods then ended.

12. RELATED PARTY TRANSACTIONS

Posera recognized revenue from a company controlled by a current director, during the three-months ended March 31, 2016, in the amount of \$47,395 (2015 - \$17,856). Additionally, Posera recognized operating expenses and purchased products of \$20,146 during the three-months ended March 31, 2016 (2015 - \$26,202) from a company controlled by a current director. All transactions were agreed upon by the parties and were completed at the exchange amount. As at March 31, 2016, Posera has a receivable position of \$60,573 (December 31, 2015 - \$33,390), and a payable of \$116,475 (December 31, 2015 - \$121,198), which will be settled between the related parties in the normal course of business.

During the three-months ended March 31, 2016, the Company received legal fees and disbursement invoices totaling \$480 (2015 - \$19,142), from law firms, which a director of Posera is and/or was a partner. As at March 31, 2016, the Company has a payable position of \$52,657 (December 31, 2015 - \$52,115) which will be settled between the related parties in the normal course of business.

This director is partner at a law firm Posera utilizes and previously, this director was a partner of another law firm that Posera also utilizes. As the director no longer has an equity interest in the previous law firm, Posera has not included the payables to the former law firm as at March 31, 2016 or December 31, 2015, but Posera has included expenditures incurred for the period that the director was a partner at each respective firm.

Compensation of key management

Compensation awarded to key management includes the Company's directors, and members of the Executive team, which include the Chief Executive Officer, Chief Financial Officer, Senior Vice-President, Integration and Administration, Senior Vice-President, Special Projects and Infrastructure and Vice-President, Business Development, is as follows:

	Three-months ended March 31, 2016		Three-months ended March 31, 2015

14. FINANCIAL INSTRUMENTS

The fair value of the financial assets and liabilities, excluding notes payable, approximate their carrying value as at March 31, 2016 and December 31, 2015. The fair value of the note payables is disclosed in Note 9. Fair value estimates are made at a specific point in time based on relevant market information. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. The fair-value estimates for notes payable utilized a discounted cash-flow valuation method, with an estimated discount rate of approximately 10.00% as at March 31, 2016 (December 31, 2015 – 10.00%). Changes in assumptions could materially affect estimates.

The Company's financial instruments' carrying values by classification have been summarized below:

15. SEGMENTED INFORMATION

The Company is divided into two reportable segments: Point-of-Sale ("POS") and Payments. The POS segment focuses primarily on selling, installing and servicing POS hardware and software directly to end-users and on developing, licensing, distributing and marketing POS software indirectly through a dealer network. The Payments segment focuses primarily on selling and installing payment processing hardware and recurring payment processing services for credit and debit cards. The accounting policies of the segments are the same as those described in the summary of significant accounting policies. The Company evaluates performance based on the profit and loss from operations before income taxes, amortization, interest, realized and unrealized foreign exchange gains or losses, other gains or losses and other comprehensive income. The

15. SEGMENTED INFORMATION (continued)

Company manages each segment separately and management at the time of the acquisitions were retained. The results from discontinued operations, as disclosed in Note 17, have been excluded from the segmented results.

18. SUBSEQUENT EVENTS

On April 29th, 2016 the Company completed the sale of all the issued and outstanding shares in the capital of its wholly owned subsidiary Zomaron Inc., to a company established by Zomaron's current operating management team.

Consideration for the sale comprised of a cash payment of \$2.0 million. Additionally, there was a repayment of an existing intercompany debt in the amount of \$1.3 million. Further, the buyers have assumed a secured note payable of \$1.1 million, \$0.4 million of which is unconditionally due on or before December 31, 2016, and \$0.7 million of which is due immediately upon certain conditions occurring. As at the date of the sale, Zomaron's working capital was a deficit of approximately \$0.2 million.
