Boost Productivity and Efficiency for Your Clinical Studies

These are just some of the value-added components IMARC injects into our consulting services. Need a qualified expert to bounce ideas off or challenge your thinking? Tap into our knowledge base and ensure that what works gets done and what doesn't gets reworked. Unexpected issues that pop up can make or break your study. IMARC Consultants have the research experience to adapt quickly, react proactively and intelligently balance your priorities.

Finally, we give you the boost you need to function at the highest level. Have a special request? We get it done. Stuck with inexperienced staff? We can train them. Hit by personnel turnovers? We understand how to strategize and stabilize the team.

When it Comes to Standard Operating Procedures, Raise Your Standards

IMARC Consultants can work independently, or with your management team – from the start, or on the fly – to handle any SOP-related situation. That includes simple reviews, developing procedures from scratch, or leading the entire process. We can drive things or work seamlessly in the background – with U.S. or multi-national based teams.

IMARC Consultants Put the Specifics in Study Management

Expanding, extending and enforcing study and site management techniques are all areas which IMARC Consultants excel. We can help you:

- **Fine-Tune Your Monitoring Strategy**

Use our knowledge to develop an approach for field-based monitors to follow from the get-go, or when they need to change course after identifying problems.

- **Accelerate Your Auditing Strategy**

Implement an IMARC “Be Ready from Day One” plan that enables decision-makers to schedule audits at the most advantageous times.

- **Assess Your Study Team**

A full assessment – whether at the sponsor and/or site team level – is an effective way to determine whether advanced training, more frequent visits, mentoring or other adjustments are required.

- **Roll-Out Enrollment Support Initiatives**

Why can't your studies enroll faster? How much revenue are you losing for every day your product approval is delayed? Enroll patients faster by having IMARC troubleshooters track down and eliminate barriers.
