

EXPENSE

Create, submit or approve expenses anytime, anywhere, on any device

As the rate of business change accelerates, agility within your organization is increasingly necessary. Spending hours managing expenses via spreadsheet or using outdated software is no longer a viable option. The costs are too great, including lack of visibility to make data-driven decisions, lack of control, and inefficient use of resources. With the right expense management solution, your organization can better manage these costs while streamlining expense management processes.

Chrome River EXPENSE is a leading expense management solution that enables your organization to streamline processes, reduce costs and increase visibility and compliance, all while providing the ultimate employee experience. Our fully mobile solution enables your employees to work while on the go or at their desktop. Whether your organization operates across multiple countries, or just one, we can scale with you. Chrome River lets business flow.

Remove Friction

Get rid of spreadsheets and outdated expense solutions that are slowing you down. We designed our solution to simplify the expense management process, not complicate it. With a fully mobile interface, your employees can manage their expenses on the go. Approvers can easily approve expense reports straight from their email on any device – all without the extra clicks.

Improved Compliance

Managing the budget is challenging, especially without the right controls in place. With Chrome River, better manage and control spend, across any country, with the ability to configure policies to your organization's needs. Compliance alerts provide traveler transparency into out-of-policy spend before the spending occurs. Say goodbye to excessive spending and hello to improved control.

Go Global

Your organization functions around the world at all hours, in different languages and currencies – you need an expense management solution that does too. Our solution can meet any global need with the ability to process expense reports and reimburse end users in more than 70 countries worldwide, across 31 different languages and in every currency used around the globe.

Fully Mobile-Enabled

- Create, submit and approve expense reports from your mobile device. Work doesn't have to stop at a desktop.

Configurable Business Rules

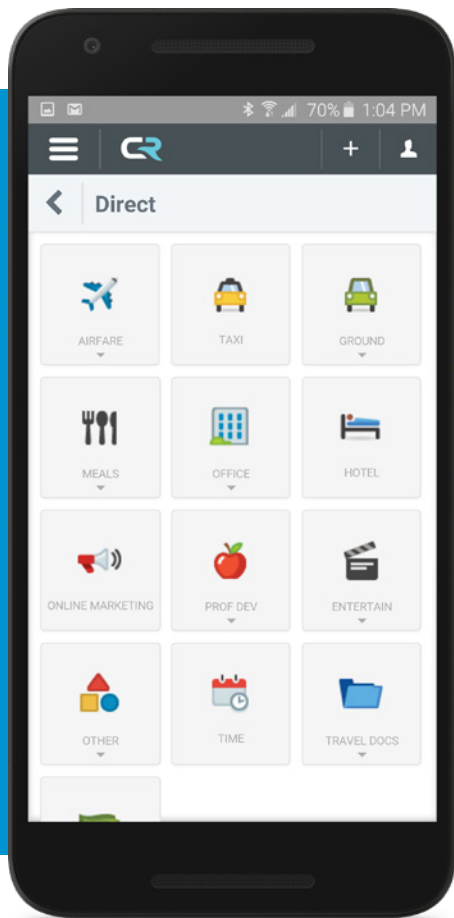

- Gain control and efficiency with configurability that works the way your organization works. There's no such thing as one-size-fits-all with Chrome River.

Seamless Booking Tool Integration

- Enjoy the freedom to choose the best-in-breed booking tools with our flexible integration platform.

Embedded Analytics Solution

- Get complete visibility with embedded analytics tools. Leverage our data visualization tool to help uncover critical trends in your data.

Chrome River EXPENSE

The most configurable and only truly mobile solution for the Global 2000.
