

WorldSpace Comply

Accessibility Monitoring and Reporting

> Overview

Perform enterprise-level accessibility audits and meet your compliance needs with advanced reporting, monitoring, and management of accessibility issues against industry standards or customized guidelines.

Worldspace Comply helps ensure your large website becomes accessible and remains accessible. Dynamically scan, monitor and report on the accessibility status of your site across business and development teams.

> Dynamic Crawling

Modern web applications produce varying content dependent on user interactions. Unlike traditional accessibility tools built for static HTML content, WorldSpace Comply is designed to monitor event-driven, highly-interactive content and can test the DOM as it changes over time.

> Relevant Reporting

Large websites are constantly changing and adding new content. WorldSpace Comply links content creators, designers, developers and project managers to ensure accessibility throughout the workflow.

Who is WorldSpace Comply For?

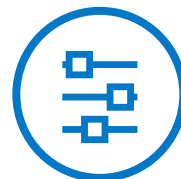

- **Subject Matter Experts**
Capture detailed accessibility issues at scale by using Comply to automatically scan large and complex web applications.
- **Accessibility Managers**
Track Accessibility conformance over time using Comply Reporting.

Easy Accessibility Auditing

Continuous Reporting

Consistency and Control

WorldSpace Comply

Organization Dashboard for: ABCD Computech

Note: This dashboard report was automatically generated on 01-28-2018. Data for new projects will not be displayed on the dashboard report until 01-29-2018 at 10:00

Date Range - (mm-dd-yyyy)
10-30-2017 - 1-28-2018 Go!

ACCESSIBILITY

Name	Total Pages	Score	Trend	Common Issues
ABCD Computech	250	45% ★☆☆☆☆	100% 2018/01/25	2

Project Dashboard for: www-checkout

Date Range 02-11-2018 - 03-13-2018 Go!

Project snapshot - effective 3/13/18 10:00 AM

Snapshot for-	Score	Issues Per Page	Pages				
			Total	Critical	Serious	Moderate	Good
www-checkout	85%	11	606	507	85	9	5

Automated issues

Grouping	Standard	Priority	Description	Issues	Pages	% of Pages
Aria	Success Criterion 4.1.1 Parsing	Critical	Ensures ARIA attributes are allowed for an element's role	236	90	
Aria	Success Criterion 4.1.2 Name, Role, Value	Critical	Ensures ARIA attributes are allowed for an element's role	29	29	5%
Aria	Success Criterion 1.3.1 Info and Relationships	Critical	Ensures elements with an ARIA role that require child roles contain them	3	3	0%

Use Comply in production for automated regression testing.

> Mobile Web Testing

Web content is increasingly accessed on mobile devices. WorldSpace Comply provides support for mobile web browsers by emulating their behavior. Device screen resolution parameters that are used by responsive websites to determine which mobile device is used can be changed to assess content on all mobile devices.

> Benefits of working with Comply

Easy Accessibility Auditing

WorldSpace Comply provides advanced automated auditing that catalogs your entire website devices.

Continuous Reporting

WorldSpace Comply's reports demonstrate accessibility changes over time, at any level of detail.

Consistency and Control

WorldSpace Comply lets you set consistent standards across multiple projects so that auditing and reporting are always consistent.

Enterprise Ready

WorldSpace Comply can audit the largest website — static, dynamic, and mobile-friendly — and delivers reports through several mechanisms such as web dashboards, exported data, and read-only reports.
