

Transform your business with SAP S/4 HANA

Drive your business transformation with SAP S/4 HANA, the new SAP suite, and SAP HANA, the in-memory computing platform to accelerate business processes, innovate and simplify your IT environment.

In today's digital world your customers demand more than ever – increased performance together with personalised products and services delivered to virtually any smart device.

With smart devices, social media, mobile apps now becoming fundamental to modern business, these tools can only provide maximum value to your business if they are tightly integrated into core business process.

SAP S/4 HANA supports your digital journey in transforming your business processes to allow you to meet your customers' increasing demands by connecting people, devices, business networks and big data in real time.

SOA People and business transformation

One of the leaders in our field, SOA People has an innovative approach and an inherent understanding of the underlying processes and technology. As certified SAP experts and as one of the world's first SAP partners to adapt vertical solutions on SAP S/4 HANA, SOA People helps you understand the benefits that SAP S/4 HANA can bring to your business.

SAP Business Suite on HANA

Run your existing Business Suite on the HANA platform to give you:

- Increased performance
- Analytical and transaction processing in one system
- A modern Fiori user experience

SAP BW on HANA

Run your existing BW system on the HANA platform.

- Real-time analysis and reporting
- Lower TCO

SAP BW/4HANA

Use this new state-of-the-art data warehouse to combine all your data and process them in milliseconds.

- Reduced development effort
- Manage all internal and external data
- Modern user experience
- 10x-100x higher performance

Big data analytics

Use the unique computational power of HANA to crunch huge amount of data in a split second with smart in-built algorithms.

- Combine internal business data with external sources (IoT, social media, etc.)
- Use predictive algorithms
- Apply machine learning
- Offer real-time insight

Native HANA applications

Build complete applications in HANA from database to modern responsive user interfaces.

- Build highly performant web and mobile applications
- Leverage the in-built business libraries of HANA
- Low TCO

SAP S/4HANA

Grow your business with this re-imagined new Enterprise Management solution

The next generation of SAP S/4HANA gives you a business suite fit for today's digital world. Redefining the concept of enterprise resource planning for the 21st century, SAP S/4HANA unites software and people to transform your business in real-time.

Business models

Connect to people, devices, business networks and big data in real time, to do things previously unimagined

Business processes

Run all processes in real time, eliminating batch processing

Business decisions

Conduct powerful predictive analytics and simulations based on live real-time data, empowering immediate decision in your executive meetings

Data models

Reduce TCO and data footprint, eliminating indices, aggregates and redundancies, simplifying system landscape

User experience

Accelerate user adoption and value attainment with intuitive and customizable user experience for any device

System deployment

Accelerate deployment with on premise, cloud (managed, public, private) and hybrid editions combined with easy configuration

Why SOA People?

At SOA People, we support your complete journey to HANA technology as part of your digital transformation from creating initial awareness and innovation workshops through to proof of value, implementation and support.

We can help you with the following:

- Create a clear and detailed roadmap to help you transition from your current system to HANA or S/4HANA
- Provide proof of concept evaluations and scenarios
- Deliver a simple 5-step, highly pragmatic approach to your transitioning to SAP HANA and S/4HANA
- Provide proven experts in HANA and all SAP solutions

Starting your HANA journey...

Concerned in the impact of your custom code for your transition to HANA and S/4HANA? We analyze your ERP system in 3 days and give you a clear overview in a management dashboard.

Need to convince your decision makers about the power of HANA? We offer a Proof-of-Value, where you can explore SAP HANA technology with your data and processes in 25 days.

Need to prepare your business to adopt HANA? We offer a 5-day functional and technical complete assessment of your business and landscape to advise you on your architecture, roadmap, and implementation approach.
