

TRUSTED PARTNERS & ENGAGED EXPERTS IN

CHEMICAL

avidsolutions
Industrial Automation & Process Control

Your plants are well run, but are product quality and yields as high as they could be? With a thorough knowledge of the chemical manufacturing process, Avid Solutions' experts are able to remove the roadblocks and bottlenecks to enhance the performance of your process and your bottom line. Improvements are available in process order handling, lot tracking, material control, recipe management, quality control and more.

Our proven S88 batch solutions have consistently yielded improved quality and produced double-digit throughput improvement.

Some organizations fear and resist change. But Avid's proven track record of project success and risk mitigation strategies transform the nightmare of change into improvements welcomed by all.

Chemical Applications

Batch & Continuous Processes

- Emulsions
- Resins
- Acid Plants
- Ammonia Plants

Distillation Columns

Boiler/Heater Combustion Controls

Boiler/Heater Burner Management

Advanced Process Control

Plant Optimization

Utility Controls

- Air
- Steam
- Water
- Nitrogen
- Refrigeration

Waste Water Processing

Tank Farms

Remote I/O Monitoring

Representative Clients

AE Polysilicon

Albemarle Corporation

Cornerstone Chemical

Cytec Industries

DAK Americas

Elementis Chromium

FMC Lithium

Kemira

Momentive

PCS Phosphate

SABIC Innovative Plastics

Sun Chemical

Syngenta Crop Protection

Ticona
