

TRUSTED PARTNERS & ENGAGED EXPERTS IN

# LIFE SCIENCES

---

***avid***solutions  
*Industrial Automation & Process Control*

When a new product is the driver for a new control system, every day of waiting for system completion is a day that patients go without treatment and a day with lost revenue. When Avid Solutions is your system integration partner, you receive solid experience in streamlining your project, resulting in a smooth and efficient implementation.

**Smart about cGMP Compliance** - In the transition from paper to digital record-keeping, Avid Solutions works to ensure compliance to standards without compromising secure and reliable records.

**Smart About Electronic Batch Records** - Many fear vulnerability and uncertainty along the path to EBR. With Avid's in-depth knowledge and experience, the path will lead to improved compliance, shorter quality review cycles, reduced product loss, and potentially decreased batch cycle times.

**Smart about Priorities** - Not all risks are equal. Avid Solutions can work with you to focus on the steps in your process that carry the highest risks and design solutions to minimize those risks.

**Life Sciences Applications**

- Fluid Bed Dryers
- Electronic Batch Records
- CIP / SIP
- Formulation and Filling
- Lyophilizers
- Product Milling
- Test Documents
- Validation Execution
- USP / WFI
- Solution Delivery
- Biotechnology Applications
- Environmental Monitoring
- Data Historian
- Blenders and Fitz Mills
- Packaging & Inspection
- Film Coating
- Electronic Work Flow
- Ultrafiltration Automation
