

Insights Transformational Leadership (ITL)

ITL is a practical solution designed to help leaders really understand their leadership capabilities and how they can improve the productivity of the whole organization.

It helps them to:

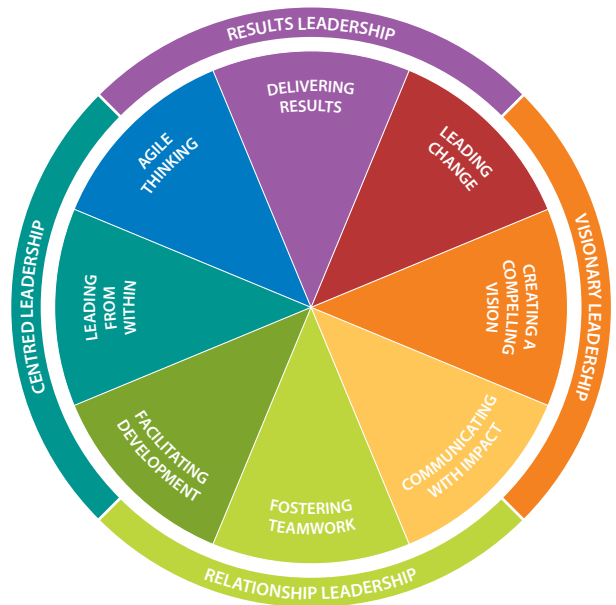

- Understand how they measure up against specific performance indicators
- Realize how others perceive their leadership style and how they can make changes based on that feedback
- Identify their strengths and weaknesses
- Adapt their approach to motivate and inspire within a diverse organization
- Influence stakeholders in a positive way
- Inspire people around them to excel, even during the most challenging times
- Create a strong, balanced team

How it works

Insights Transformational Leadership can be customized to complement any existing leadership framework.

Our team of experts will guide your leaders through the eight dimensions of leadership, enabling them to examine their effectiveness in each of these areas. Leaders can experience all eight dimensions, or just those most relevant to their development journey and career path.

Using our world leading models, Insights Discovery and Navigator, we'll help your personal development at an individual, team and organizational level.
