

Candidate.Guru Spring Release 2017

Predict a fit between a candidate/employee and a team

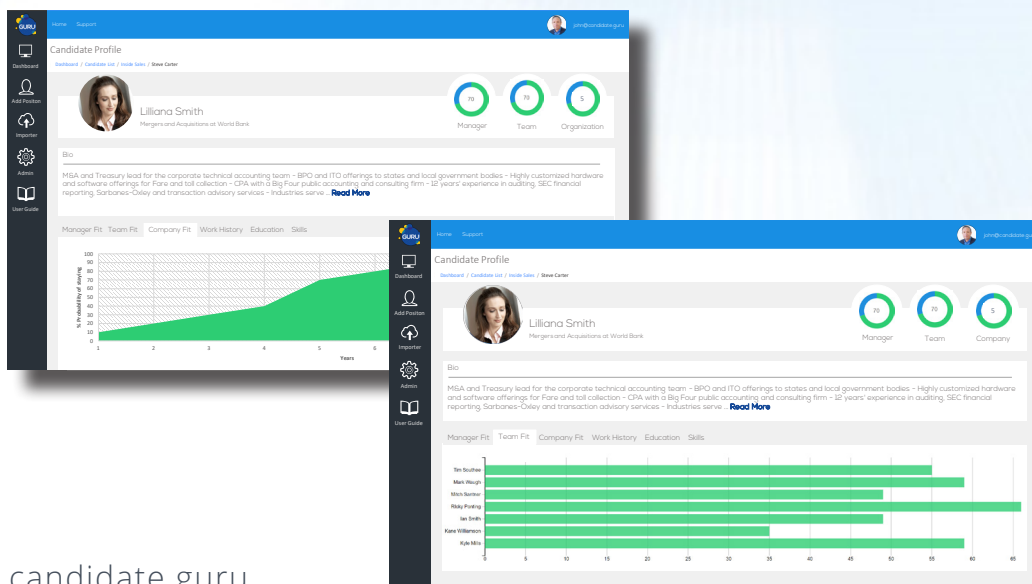

72% of team projects fail because of a breakdown in communication. Now you can rank candidates or employees by how successful they will be with your existing teams.

Predict the tenure of a candidate or existing employee

Reduce the turnover of existing employees and rank incoming candidates by how long they will stay at your organization.

New and improved User Interface

Faster, cleaner UI with enhanced dashboards and candidate profiles.

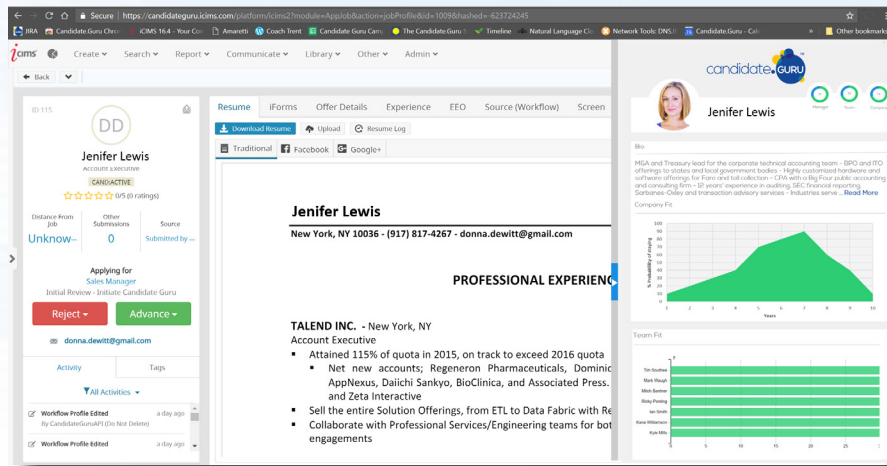

Intergrate to any ATS/HRIS System

Dont change your workflow – just improve it, with Candidate.Guru rankings right inside your existing systems.

New and improved Chrome Extension

Use our chrome ext to view Candidate.Guru results from LinkedIn or your existitng ATS.

New custom services offering

Build custom models to predict what matters to you, get sourcing services for common or hard to fill roles, or have our experts provide a full recruiting service using Candidate.Guru’s patent-pending technology.

Open API

Integrate Candidate.Guru’s scores and rankings into your existing application with our restful API.
