

CivicPlus[®] Pay

The Secure, Integrated
Payment Application
for your CivicRec[®]
Software

Modern, contactless government means your residents need secure, convenient ways to issue payments from smartphones, tablets, or desktop computers. CivicPlus Pay is the utility application that connects your CivicRec solution to select payment gateways. With Pay, you can efficiently take digital payments while giving residents more ways to pay at any time, from anywhere.

Our solution supports the latest, secure digital transaction technology with Europay, MasterCard, and Visa (EMV) for chip-based debit and credit card transactions. It also allows residents to remit payment for municipal services online, securely, from a computer, or mobile device.

We make it easy for municipalities to process digital transactions by:

- Providing a single, integrated tool to process payments
- Maintaining relationships with payment processors
- Ensuring PCI digital, financial compliance requirements are met
- Providing unified reporting—no duplicate entries sent to your payment gateway
- Managing refund requests and chargebacks

For more information, contact your CivicPlus solution representative at 888.228.2233 or visit civicplus.com.

Allow residents to pay for:

- Community activities
- Education courses
- Community events
- Summer camps
- Facility memberships
- Virtual programs
- Facility rentals
