

Information and overview for tilting containers For chip dumper bodies

Tilting containers are available in many designs. A key consideration when ordering is whether the process of emptying is to performed exclusively manually or using a forklift.

manual tipping:

if no forklift is available for emptying, the tipping process must be performed manually. for manual tipping procedures, the selection of a mobile version or alternatively rollers as accessories is therefore recommended.

tilting containers for manual emptying are designed such that ground-level emptying is possible. This option should only be se lected if no heavy material is collected and tipping out at high altitude is not required.

Self-tipping containers: Exhibit a favourable centre of gravity that allows the tipping procedure to be performed automatically on unlatching when the container is loaded.

Dispenser systems:

Containers with a dispenser system are tilted more slowly, making the procedure gentler for the forklift. Furthermore, the container automatically "rolls" back into its actual position after emptying.

Choose your preferred colour (no extra

tipping from the forklift operator's seat:

this container variant features a special device that facilitates ergonomic yet safe emptying of the container. Container is released via a steel rope.

all containers with this function are protected against sliding via a link chain, and against unintentional tipping.

Chip containers: A chip collection version must be selected for chip collection and fluid and solid separation. Our chip containers are equipped with a perforated plate and drain valve as standard and are welded so that they are oil-tight and watertight.

swarf containers, manual tipping - mobile

with floor-level emptying option

Application:

An indispensable aid for collecting and separating liquids from solids and for transporting waste, bulk materials, chips and mass produced parts of all types.

Execution:

- Skip with sliding handle
- · Stable sheet steel structure with edge reinforcement, base frame made of section steel
- With perforated sheet insert for chip collection, hole diameter 3 mm, division 6 mm and drain valve 1
- · Fork pockets with protection against accidental slipping and tipping
- Easily movable with two wheels and one steering wheel (from content of 600 litres with two steering wheels) made of solid rubber, diameter 250 x 60 mm, one steering wheel with wheel brake

Ident. No. 142

- With floor-level emptying option
- Mobile thanks to wheels which mean it can be used everywhere
- · Manual tilting of the trough ensures emptying with no residue, with locking protection against tipping over

Delivery:

Goods supplied without packaging as standard. Packaging on request.

Technical data:

- With stacker seat tilt function: No
- With perforated sheet: Yes With drain valve: Yes
- Oil and watertight: Yes

fetra Swarf containers, manual tipping – mobile with Totalstop brake system Transportgeräte with floor-level emptying option

Application:

An indispensable aid for collecting and separating liquids from solids and for transporting waste, bulk materials, swarf and mass produced parts of all types.

Execution:

- skip with sliding handle
- robust sheet steel construction, double-folded top rim, double-folded dumping edge
- with filter for separating liquids and solids
- 2 steering and 2 fixed castors, 200 x 40 mm TPE wheels, hubs with grooved ball bearings, Totalstop braking system

no link chain as slide guard (see no. 50266034)

Advantage:

- Totalstop brake system for ideal locking of container for tipping
- with floor-level emptying option

Technical data:

- With stacker seat tilt function: No
- With perforated sheet: Yes
- With drain valve: YesWith wheel lock: Totalstop
- Oil and watertight: Yes

chip container with 3 release points

the automatic one with dispenser system

Application:

for collecting and separating liquids from solids and for transport and/or disposal of waste, bulk goods, chips and mass parts of all kinds. For offset tilting over the container.

Execution:

- 3 automatic release points
- automatically closing protection against accidental slipping
- Innovative, automatically locking safeguard against unintentional tilting
- sheet metal tray with surrounding edge profile, welded oil-resistant and watertight
- screen plate insert hole diameter 3 mm, partition 6 mm, drain valve 1" for draining off liquids

Advantage:

Technical data:

particularly suitable for collecting swarf

With stacker seat tilt function: Yes

With perforated sheet: Yes

With drain valve: Yes

• Oil and watertight: Yes

rolling mechanism ensures comfortable tilting and back from the truck seat

• efficient infeed of the container due to self-closing backup on the fork pockets

Product details

For time-saving and safe handling of the container and to offset tilting over the container. The driver can stay in the cab to attach the safety chain for picking up and dropping.

Swarf container, tipping from the seat of a forklift truck - mobile

Carrying capacity 1000 kg, can be emptied from the ground

Application:

For the collection and separation of liquids from solids and for the transport or disposal of all types of waste, bulk materials, chips and mass-produced parts.

Execution:

- High flexibility for the transport and unloading of bulk materials
- Wheelset and pushing handle for easy manual transport
- Fork pockets for transport with forklift truck
- Ground-level emptying or with fork-lift truck in the case of large containers
- Robust steel sheet structure, base frame with fork pockets
- Tiltable trough
- Protections against accidental slipping and tipping
- 2 steering and 2 fixed castors made of polyamide, diameter 180 mm, of which one steering castor with locking device—design height 225 mm, max. carrying capacity 1000 kg

Ident. No. 884

Advantage:

Particularly suitable for collecting chips

Delivery:

Goods supplied without packaging as standard. Packaging available for an additional charge.

Technical data:

- With stacker seat tilt function: Yes
- With perforated sheet: Yes
- With drain valve: Yes
- Oil and watertight: Yes

Swarf container, tipping from the seat of a forklift truck

load-bearing capacity of up to 1250 kg, mobile with unwinding system

Application:

For the collection and separation of liquids from solids and for the transport or disposal of all types of waste, bulk materials, chips and mass-produced parts.

Execution:

- Stable base frame with rollers, sliding handle and fork pockets
- Sheet metal tray with surrounding edge profile, welded oil-resistant and watertight
- Screen plate, hole diameter 3 mm, partition 6 mm, drain valve 1" for draining off liquids
- Protection against accidental slipping and tipping
- Mobile with wheels made of polyamide

Advantage:

Particularly suitable for collecting chippings

- Favourable load centre, tilting at any height using a wire rope, anti-roll-off mechanism ensures convenient forwards and backwards tipping from the forklift seat
- Mobile thanks to wheels which mean it can be used everywhere

Delivery:

Goods supplied without packaging as standard. Packaging available for an additional charge.

Notes:

Upon request: galvanised lid, opening on two sides

Technical data:

- With stacker seat tilt function: Yes
- With perforated sheet: Yes
- With drain valve: Yes
- Oil and watertight: Yes

Tilting container, manual tilting

carrying capacity 300 kg

Application:

For the collection and disposal of all types of bulk goods and solid materials with floor-level emptying option.

Execution:

- Robust sheet steel structure with edge reinforcement
- Tiltable trough with handle
- Base frame with fork pockets
- Easily mobile using stacker
- Oil-resistant and watertight
- Protection against accidental slipping and tipping
- Optionally box-shaped or low trough
- All dimensions without wheels

Advantage:

 With floor-level emptying option

Delivery:

Goods supplied without packaging as standard. Packaging available for an additional charge.

Notes:

Upon request: galvanised lid, opening on two sides

Technical data:

- With stacker seat tilt function: No

Tilting container, manual tilting - mobile

carrying capacity 300 kg

MADE IN

Application:

For the collection and disposal of all types of bulk goods and solid materials with floor-level emptying option.

Execution:

- Sturdy sheet steel structure with edge reinforcement, base frame made of section steel, oil- and waterproof
- Anti-tilt securing device
- 2 wheels + 1 steering wheel (from content 600 l = + 2 steering wheels) from solid rubber diameter 250 x 60 mm, among which one steering wheel with a locking device, with a push handle
- With fork pockets with protection against accidental slipping and tipping

Advantage:

With floor-level emptying option

 Wheels mean that it is mobile and can therefore be used anywhere

Delivery:

Goods supplied without packaging as standard. Packaging available for an additional charge.

Notes:

Upon request: galvanised lid, opening on two sides

Technical data:

- With stacker seat tilt function: No
- With perforated sheet: No
- With drain valve: No

Execution:

- 3 automatic release points
- Automatically closing protection against accidental slipping
- Protection against accidental tipping
- Favourable load centre
- Sheet metal tray with surrounding edge profile
- Sturdy base frame with fork pockets

Advantage:

- Offset tilting over the container due to 3 automatic release points
- efficient infeed of the container due to self-closing backup on the fork pockets

Technical data:

- With stacker seat tilt function: Yes
- With perforated sheet: No
- With drain valve: No
- Oil and watertight: No

Cleaning station, equipped

With paper dispenser and two materials collectors

Application:

The multifunctional waste and cleaning station for central and mobile provisioning and storage of cleaning equipment can be moved around to where it is needed, meaning staff no longer have to cover long distances to stationary cleaning points.

Execution:

- sturdy sheet steel construction, fully welded
- with accent roof, RAL 5010 gentian blue
- outer walls and divider with 10x10 mm square perforation, grid spacing 38 mm, and slotted perforation for attaching additional equipment elements and accessories, see from no. 50240 124-138
- easy to move with four integrated handles in outer walls
- centre divider useful depth 300 mm each
- mobile thanks to 4 steering rollers Ø 125 mm, with trackless light-grey solid rubber tread and thread protection, 2 rollers with wheel blocks

 other colours (at no extra charge) and special equipment requirements deliverable on request

Advantage:

- mobile for quick transfer to where it is needed
- square and slotted perforations in walls enable the trolley to be custom-equipped with additional
- accessories as per requirements • versatile and comprehensive range of further
- trolley accessories • rapid retooling and conversion of accessories
- rapid recooling and conversion of accessories
 ensures order and cleanliness in the workplace

HAM-O® absorbent mat - in UNIVERSAL and OIL-ONLY versions 回报

Drops, leaks and dirt disappear in the unique camouflage pattern

40 Application:

Absorbs oils, water and coolants. Ideal for covering large areas and for soaking up leaks.

Execution:

- Made from 100% polypropylene
- Extremely durable

Advantage:

- Dirt blends into the pattern, so the mat does not need to be replaced as frequently
- Extremely durable and absorbent

Notes:

Solvents and aggressive chemicals may affect the print.

Technical data: Type: Universal

- Type description: MAT 116
- Absorptive capacity: High
- Length x width: 4600 x 81 cm
- Perforation width x perforation length: 25 x 40.5 cm
- Suction volume: 179.51
- Water-repellent: No

GRIPPY FLOOR MAT® floor mats from polypropylene fibres

Absorbs oil, water, coolants and solvents

Execution:

- Absorbent layer takes up liquids and draws them away from the centre of the mat
- Interwoven fibres catch dirt and fine particles, preventing their spread
- Tested and certified (by NFSI)
- classified as slip-resistant R13 as per DIN51130 suitable for use in work rooms and work areas with an increased risk of slipping due to grease, oil, food, debris, dust, flour, paint residues etc
- tested in accordance with BS 7976-2:2002+A1:2013, with proven low slip potential, both in wet and dry conditions
- complies with fire protection class Bfl-s1 in accordance with the requirements of BS EN 13501-1

Grippy® absorbent mat – with self-adhesive coating

Absorbs oils, water, coolants and solvents

Application:

Suitable for passageways and routes used by pedestrians and vehicles - even areas with heavy forklift traffic!

Ident. No. 362-372, 376-386, 394-396

Execution:

- made of polypropylene with polyester seams
- With self-adhesive back (proprietary adhesive)
- outstanding durability

Advantage:

- · Full-coverage adhesive backing holds the mat in place so that it cannot bunch up, slip or be blown awav
- Sticks without leaving any residue
- Zigzag seams increase stability and durability
- polyethylene coating prevents absorbed liquid escaping

Tested and certified by the National Floor Safety Institute (NFSI)

Notes:

All adhesives have the potential to dissolve any coatings on the application surface, depending on the condition and age of the floor. If in doubt, we recommend testing the mat in a non-critical area.

Technical data:

- Type: Universal GRIPPY®
- Absorptive capacity: Middle Length x width: 760 x 41 cm
- Suction volume: 5 I
- Number of pieces per packet: 1 PCS

Part cleaning devices - Your benefits

ment and your wallet.

1 The upper part contains the cleaner A cycle principle that helps the environ-2. The lower part collects dirt and particles

For cleaning metallic and plastic components contaminated by grease Industrial parts cleaning and surface degreasing through manual brush cleaning.

Advantages:

- Time and money savings as the cleaner does not need to be heated up
- · Enormous reduction in costs and environmentally-friendly operation thanks to multiple uses
- FREE SERVICE: Contaminated cleaning fluids are collected free of charge when a new drum is delivered. A certified waste disposal company will be responsible for collection.
- Here's how it works:

The pump draws fresh cleaner in:

- Out of the centre of the drum into the hollow brush of the device.
- The used cleaner settles:
- It sinks to the bottom of the drum
- The cleaning fluid is replaced via a
- simple drum change. And the
- cycle starts again from the beginning!
- You have full control over your costs with an effective, efficient
- and user-friendly system solution!

absorber cabinet with compressed air powered extraction system

for cleanliness and air pollution control in the workplace

Application:

chips and droplets are vacuumed from the interior of the container. this way, the absorber cabinet ensures clean floors and air. ideal for any workplace where workpieces and tools must be kept clean.

Execution:

- Stable and sturdy sheet steel housing with built-in injection system (operated with compressed air) and collection container
- The compressed-air gun and the injection system are actuated with a foot valve attached on the front side, so that only as much compressed air as required for the cleaning is consumed.
- The parts to be cleaned are simply blown off on the grating with the compressed-air gun
- portable like a sack truck with two wheels on the rear side
- The injector system extracts all contamination downwards into a collection container which must be emptied on a regular basis

Advantage:

 Swarf, oil and coolant residues are no longer simply blown out into the premises, but are purposely sucked into the collecting container provided.

Ident. No. 003

- No emulsion or oil vapour in the air—no dust and no chips flying around—no contamination of the workplace
- Rapid connection to existing compressed-air system
- can be installed directly in or near machines so that the processed workpieces and parts can be immediately blown off

Delivery:

Fully ready for use with connection for compressed-air quick-release coupling (plug-in nipple DN 7.2), incl. compressed-air gun and hose

Technical data:

- Height: 1300 mm
- Depth: 500 mm
- Working height: 850 mm
- Clear opening depth: 480 mm
- Min./max. working pressure: 5-10 bar

mobile welding fume extractor Тка

With filter and flexible extractor arm, hose version, > 99 % filtration efficiency

Application:

Ident. No. 011: For extracting fumes, dust and also gases that are released during welding processes for cutting and joining when machining unalloyed steels, including high-alloy chromium/nickel steels.

Ident. No. 020: For extracting fumes during welding work with unalloyed steels and precious metals.

Execution:

- With flexible suction arm in hose version
- With filter
- Suction arms can be swivelled through 360° and can be moved into any desired position, which is self-supporting
- Ident. No. 011:
- When the filter is saturated, an indicator lamp shows that a filter change is necessary
- The particles and gases are filtered out of the air stream in a multi-stage filtering process and the clean air is fed back to the working area
- Filter elements are accessible via a maintenance hatch and therefore can be easily and quickly removed
- Ident. No. 020:
- Monitoring of the volume flow and filter indicates when a filter change is necessary

- Thanks to effective air guidance in the unit, the operator cannot come into contact with the harmful substances
- Air discharge on the rear of the unit is via an outlet grille facing upwards, rendering undetectable disruptive air flow at a distance of 1 m
- With operating hours counter • With powerful fan using high negative pressure,
- which guarantees a high volume flow even when the filter is saturated

Advantage:

- Ident. No. 011: Tested based on DIN EN ISO 15012-1 (2005) and IFA (previously BGIA) certified (IFA no. 1102002) for welding fume class W3
- Ident. No. 020:
 - Complies with the safety requirements for equipment in welding fume class W3 (highly alloyed steels)
 - When used as intended, the system can be used for air circulation, as the prerequisites for exemption clauses in accordance with the new statutory German Hazardous Materials Ordinance (GefstoffV) are satisfied
 - Seal seat raising unit guarantees complete seal integrity and thus the filtration efficiency of the filter equipment

Collection tray for 60-litre drums

Made from steel, with grating

For the proper and safe storage of drums, approved for inflammable liquids of GHS categories 1-3 as well as water-hazardous liquids of GHS categories 1-4.

Execution:

- 3 mm thick welded sheet steel structure
- With galvanised grating (carrying capacity 1000 kg/m²)
- With support feet, 100 mm ground clearance

Technical data:

Declaration of conformity in acc. with StawaR: Yes

Mobile collection trays for 60-litre and 200-litre drums

Made from steel

Application:

For safe storage and filling and for mobile applications. Approved for flammable liquids in GHS categories 1–3 and liquids which pose a hazard to water in GHS categories 1–4.

Execution:

- 3-mm thick welded sheet steel structure
- With removable, galvanised grating
- Optional drum support for horizontal storage of drums and for filling
- 2 steering rollers and 2 fixed castors made from polyamide, 1 steering roller with locking device
- Ident. No. 611-616: Roller Ø 100 mm, structural height 125 mm
- Ident. No. 621–686: Roller Ø 180 mm, structural height 220 mm
- Ident. No. 671–686: With profiled edges on both sides - therefore particularly robust

Technical data:

- With container rest: No
- With sliding handle: Yes
- Declaration of conformity in acc. with StawaR: Yes

DOM locking system (suitable for HK tool cabinets, HK tool shelves, HK workbenches, HK hinged door and sliding door cabinets) and height compensation for

Security cabinet

For substances hazardous to water, lockable

Application:

For the safe, correct storage of substances hazardous to water.

Execution:

- Stable welded sheet steel structure
- Tightly welded, powdered trays, complies with German Water Resources Act (WHG § 19)
- Tray individually height-adjustable in increments of 17 mm
- Doors with ventilation slots (square hole grid) for natural forced ventilation as well as reinforcement pockets for increased stability, approx. 125° door opening angle
- Door lockable by a turning handle with cylinder lock, incl. two keys

Food-safe polyethylene (HD-PE)

- Application: For the storage and filling of liquids
- Execution:
- Acid- and chemical-resistant
- Temperature-resistant up to 73°C
- With UV protection for a longer service life
- Large filling opening diameter 88 mm
- User-friendly drain valve with wide thread 22 mm
- Locks can be sealed
- Filling level control by means of transparent design

Technical data:

Material: PE - Polyethylene

With volume of 10 litres with additional discharge pipe Ø 18 mm

Small cask rack with shelves

Steel, galvanised

Application:

For the proper and safe storage of small casks, approved for inflammable liquids of GHS catego-ries 1–3 as well as water-hazardous liquids of GHS categories 1-4.

Execution:

- Collection trays made from 3 mm sheet steel
- Easy mounting with the bolt-free plug-in connector system

Technical data:

- Technical data: Height: 2000 mm Width: 1000 mm Depth: 600 mm Collection volume: 30 I Number of shelving unit: 1 PCS Load-carrying capacity per level: 150 kg Declaration of conformity in acc. with StawaR: Yes Material: Sheet steel

Floor protection tray

with galvanised grating

Über MADEIN INSTIMMUNGS-RKLÄRUNG (ÜHP) Ľ ¥_2

Application:

Traversable floor protection trays for the storage and filling of flammable liquids in GHS categories 1-3 and liquids presenting a water contamination risk in GHS categories 1-4.

Execution:

- Surface carrying capacity 5000 kg/m²
- permissible wheel load over an area of 100 x 100 mm (forklift truck wheel load capacity) = 500 kg
- Traversable by forklift trucks
- With galvanised grating

Notes:

Deliverable in a stainless steel version or with special dimensions according to your requirements

- Technical data:
- Height: 78 mm
- Declaration of conformity in acc. with StawaR: Yes
- Permissible load capacity (100 x 100 mm): 500 kg
- With grating: Yes
- Coating weight per m²: 5000 kg
 Material: Sheet steel

CLASSIC line safety cabinet, type 90 DÜPERTUA

Fire-resistant (FR) for 90 minutes

Application:

For safe and legally compliant storage of hazardous materials and flammable liquids in work areas in line with TRGS 510, DIN EN 14470-1 and DIN EN 14727.

Execution:

- External corpus, powder-coated sheet steel, light grey RAL 7035
- Internal corpus made of high quality decorative panels, light grey RAL 7035
- Lockable hinged doors, door front in zinc yellow RAL 1018
- Standard features: height-adjustable tray bases, base tray, 1 perforated insert made from powder coated sheet steel, height-adjustable base
- Hinged doors with standard integrated locking system and temperature monitoring, automatic self-closing in case of fire
- Ventilation and air extraction on each cabinet level
- Viewing window provided for visual check of ventilation shut-off flaps
- Tray bases and base trays are galvanically connected with the cabinet housing - avoids risk of ignition (BGR 132 TRBS 2153)
- Feet adjustable from inside and outside

 Underpinning guaranteed due to removable base

Advantage:

- Tested safety on high level: Prototype testing by MPA, TÜV, GS/CE-marks, fire resistant for 90 minutes and High Quality seal for superior design, user-friendliness and increased service life.
- Fire resistant for 90 minutes

Technical data:

- Fire resistance rating: F90
- Door design: Full-sheet panel
- External height: 2080 mm
- Depth: 595 mm
- Interior height: 1830 mm
 Internal depth: 446 mm
- With base basin: Yes
- Number of tray bases: 3 PCS
- Colour of front: Zinc yellow RAL 1018
- Body colour: Light grey RAL 7035

Product details single-handed operation

The single-handed wing door solution offers maximum user comfort.

Single-hand hinged door system offers max. operating convenience

Source: Hahn+Kolb Werkzeuge GmbH Technical data subject to change. Availability subject to country specific rules and regulations

Safety cabinet, type 90 BATTERY CLASSIC XL

Application:

with BATTERY XL for compliance with all laws, regulations and directives, in particular the guidelines for storage in accordance with the German Insurance Association's (GDV) technical information sheet on loss prevention for lithium-ion batteries from VdS and FM Global.

With additional facilities for hazard control in the case of spontaneous combustion of the battery, process reliability is ensured and can be taken into account during hazard analysis.

Execution:

- doors fitted with integrated hold-open device as standard
- self-closing and locking doors for protection against backdraft from the inside
- Separate thermal elements for automatic door closing and locking in all storage levels in the event of a fire
- can only be unlocked by authorised personnel after a fire
- extraction of harmful vapours above the collecting tray as well as on each cabinet level
- Lower tray with perforated metal sheet rust
- bearing base, collecting tray and perforated metal inserts made from sheet steel
- hinged doors and outer body made of powdercoated sheet steel

Product details

Integrated hold-open device The doors of the safety cabinets are fitted as standard with an integrated hold-open device, which allows for the comfortable handling of batteries.

Advantage:

backdraft

Technical data:

Depth: 612 mm

Model: BATTERY XL
Fire resistance rating: F90

Number of doors: 2 PCS

External height: 2085 mm

External width: 1094 mm

Interior height: 1697 mm

Internal width: 979 mm

Internal depth: 457 mm

With base basin: Yes
Number of shelves: 3 PCS

Notes:

optimised air exchange

a thermal element

airing and ventilation on each cabinet level for

in the event of a fire inside or outside, the block-

automatic locking in the event of a fire to prevent

Optional temperature sensors and Cabi2Net or Smart Control as an early warning system for the

detection of thermal events deliverable on request.

With single-handed swing door technology: No

Colour of front: Light-tan PANTONE 389 C

Body colour: Light grey RAL 7035

age-free door closure is automatically activated via

A first in preventive fire protection Self-closing and locking doors for protection from flue gas explosions (backdraft) from the inside.

Self-closing in the event of a fire In the event of a fire – whether inside or outside the safety cabinet – door closing is automatically initiated by separate thermal elements.

Protection from flue gas explosions (backdraft) After automatic door closing and locking in the event of fires, such as due to self-ignited lithium-ion batteries, unlocking can only be carried out by authorised personnel.

Extraction The extraction of harmful vapours takes place above the floor collecting tray as well as at each cabinet level.

The use of BATTERY XL enables you to meet legal requirements, in particular the guidelines for storage in accordance with GDV's technical information sheet on damage prevention for lithium-ion batteries from VdS and FM Global. With additional equipment for hazard control in the event of spontaneous combustion of the batteries, process reliability is sustainably ensured and can be taken into account accordingly in your hazard analysis.
