DO YOU NEED ELECTRIC TOOLS?

WE HAVE WHAT IT TAKES.

For a complete range of products that meet the toughest demands, visit **www.iconridge.com**

ℹ drawer cabinets — selection overview

HK drawer cabinets facilitate and simplify the proper storage and provision of tools of all kinds, equipment and accessories. store your tools in these cabinets to save space and time. Your tools are kept clearly organised at your fingertips and held gently and securely. the cabinets are deliverable in a wide range of variants for all operating conditions.

a high level of adaptability is required in the storage facilities due to the wide range of possible tools and equipment, as well as requirements within facilities. therefore, flexibility must be guaranteed with regard to drawer design and equipment materials, especially when it comes to cabinet housings.

the **HAHN+KOLB drawer cabinet range** fulfils all these requirements. depending on the goods stored, and for optimum use of space, we offer: 3 different models in the depths 550 mm (550 series), 700 mm (700 series) and 800 mm (800 series). these are each available in the widths S (narrow), B (wide) and BX (extra wide) as well as in 4 different heights (800, 1036, 1336, 1568 mm).

the many potential combinations resulting from this modular design can even stretch to complete tool distribution systems and storage facilities. all components are largely interchangeable and can be removed and converted at any time, depending on operational and spatial requirements.

		S (narrow = 722 mm)	B (wide = 1022 mm)	BX (extra wide = 1422 mm)

advantages and features of HK drawer cabinets

housing:
- robust welded sheet steel construction
- all cabinets are equipped with a plastic-coated, 8 mm cover panel as standard.
- tip-proof thanks to built-in drawer individual extension lock
- grid system – 30: 30 mm enables individual division of drawers within the useful height on all models. the layout can subsequently be changed as required.
- partially and fully extendible drawers can be combined in the cabinet housings as required.

drawers:
- with high-quality Delrin rollers.
- rails are laterally inserted, not screwed.
- slots 'all around' for inserting compartment rails and dividers.
- perforated steel sheet base (25 mm hole spacing) for attaching and fastening individual components.
- in addition to our complete sets, there is also a large selection of individual equipment features for customising your cabinet set-up.

full extension:
- 100% full extension with 70 kg and 100 kg load capacity, 100% full extension with 200 kg load capacity with uniformly distributed load.
- ideal sliding properties due to specially formed profile and two-sided positive guide with lateral guide rollers.

partial extension:
- approx. 80% partial extension with 70 kg and 100 kg load capacity with uniformly distributed load.
- forced guiding by formed profile, smooth operation due to Delrin rollers.

hard foam inserts:
- we offer suitable hard foam inserts completely fitted with tools for all HK drawer cabinets.
- safe and protected storage of expensive tools with customised recesses
- clearly arranged and organised drawers
- contrasting blue immediately shows missing tools
- we offer our light box or contour scanner for creating customised layouts for existing and special tools

handle strips:
- aluminium handle strips with paper and cellon strips and side cover caps.
- load capacity of the drawers is visible by the coloured marking on the cover caps.
- drawers flush with cabinet housing, no protruding handle strips.
- equipped with 2 handle strips from a drawer front height of 240 mm, for improved handling when opening the drawer

drawer top-mounted cabinets
for HK drawer cabinet range

custom arrangement of the cabinets is a key point, as requirements are becoming increasingly varied.
the HK drawer cabinets enable a tall cabinet to be put together for any needs.

choose which lower section you want from our wide range of different widths and depths of HK drawer cabinets. you can then add a drawer cabinet on top in the same depth or a shorter depth.
this gives you a tall drawer cabinet with plenty of usable space for your tools.
in the case of a shorter top cabinet, an additional base panel is attached to the front section that protects the cabinet surface and can hold tools, etc.

you can, of course, also have doors on the top-mounted cabinet. doors with viewing windows are also a further option so that you can see where certain things are in the cabinet when the doors are closed.
if space is limited, roller shutter doors or sliding doors are also available. this means that you do not need the extra space in front of the cabinet that hinged doors need.

here are some examples for combinations:

locking systems for drawer cabinets

DOM® locking system:

simple modification with plug-in system
① sleeve for plug-in cylinder
② cylinder plug-in insert
③ release key
- central lock using safety rotary cylinder lock arranged on right side
- cylinders can be effortlessly exchanged using plug-in system without removing drawers

single locking, keyed differently
the locks have different closures. each key can open only one particular lock.

single locking, keyed alike
locks have the same closure. all locks can be opened with one key.

main locking system
the locks have a different closures. each key can open only one particular lock. however, the master key can open every lock.

optionally available:
ELECTRONIC CODE locking system

- open the tool cabinet using a 4-digit to 8-digit numerical code
- battery powered, no external power required, LED display for low battery warning
- no key required to open and close, therefore no loss of key possible
- up to 100 individual user PINs can be programmed to a single cabinet

optionally available:
SOFT-CLOSE-AUTOMATIC for drawers

- particularly suitable for the safe storage of delicate, sensitive tools and parts in drawers
- when you close the drawer, the damper system decelerates and closes the drawer gently and silently with the self-closing mechanism
- suitable for our HK workbenches, undercounter cabinets, drawer blocks, group workbenches, assembly trolleys, roller containers, workbench trolleys and tool cabinets
- gently closing drawers reduce impact loads on the tools and parts to a minimum

Online tool cabinet configurator
For independent planning of drawer cabinets

Individuality for your tool cabinets — just click to start planning!

www.werkzeugschrank-konfigurator.de

You can now plan our HK tool cabinet systems online and combine them according to your individual requirements. The easy-to-use configurator enables you to plan your cabinet in only a few minutes. Admire your cabinet from all sides in the 3D view and order directly.

Demo video:
use your mobile phone to scan the QR code

Advantages:
- Easily configure your custom cabinet
- Clearly designed, intuitive and easy to use
- Large selection of fitting ranges and tool trays for drawers
- Direct ordering option

Drawer cabinets, system 550 S – standard designs
Depth 550 mm, width 722 mm

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Perforated steel sheet base (25 mm hole spacing) for fastening and fixing components
- Aluminium grip handles with paper and cellophane strips and lateral cover caps

Advantage:
- Optimum operating characteristics of drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 585 mm, depth 435 mm.
Front height = FH, cabinet height = KH, see illustrations.
Technical data:
- Draw width (inner dimension): 600 mm
- Drawer depth (inner dimension): 450 mm
- Pullout type: Full extension
- Load-carrying capacity per drawer: 100 kg
- With SOFT-CLOSE closing function: No
- Drawer surface: 0.27 m²
- Lock type: DOM® locking system
- Material of the cover panel: Plastic
- Material: Sheet steel
- With doors: No
- Surface: Powder-coated

Roller-shutter top-mounted cabinets
Perforated rear panel, width 722 mm

Application:
Cabinet suitable for mounting on top of HK S system drawer cabinets (722 mm wide) or on tables and workbenches.

Execution:
- Robust, welded sheet steel construction with plastic roller shutters (light grey)
- Rear panel with square 10 x 10 mm perforations, axis distance 38 mm
- Integrated aluminium handle strip in roller shutter and DOM pressure cylinder lock incl. 2 keys

Advantage:
- Square 10 x 10 mm perforations in rear panel for individual attachment options, e.g. with tool hooks and support elements.
- 360 mm depth means folders, documents, boxes etc. can be stored on the cabinet floor

Delivery:
Without decorative materials, empty housing for customised fitting

Notes:
RasterPlan support elements and tool holders for inserting into perforated metal plate walls, see from no. 50638 300 in the Workplace chapter

Technical data:
- Door design: Plastic shutters
- Rear panel design: Perforated
- Central locking: Yes
- Lock type: DOM® cylinder lock
- Material: Sheet steel
- Colour of front: Light grey
- Surface: Powder-coated

ℹ Hard foam insert

A perfectly organised workplace increases productivity and safety in every process. For optimal performance, this perfect organisation must be maintained down to the last detail. Hard foam inserts can help: Already equipped with high-quality tools or individually planned, the inserts maintain order down to the tiniest screw. High-quality materials and the latest technology allow detailed outlines and a wide range of different cavities to be cut — always near to the surface for easy removal. Each part has its dedicated space. Hard foam inserts also secure the contents during storage and transport. The two-tone material lets you see at a glance if an item is missing.

A strong material

PE-foam is lightweight yet resilient.

Furthermore it is oil-resistant and water-resistant.

It also has shock-absorbing properties.

The hard foam is durable, odour-free and even suitable for use with foodstuffs.

ESD foam is available for electronic parts.

Use the laser engraver to add your personal signature and give the hard foam insert an individual finish.

Versatile applications – many possibilities

The largest available hard foam insert is 1500 mm long and 1000 mm wide. Almost all dimensions and shapes smaller than this are possible.

Standard versions of the material are 30 mm, 60 mm or 90 mm thick. Individual versions are possible with smaller and larger thicknesses up to a maximum of 210 mm.

There are many colour options available. The black surface layer can be combined with the following contrasting colours: Standard blue, as well as the optional colours red, green, yellow, white or grey.

Designer software for hard foam inserts
The quick and easy configurator for your individual hard foam inserts

Hard foam inserts can be custom-made for tools from the current HAHN+KOLB-product range and tailored to your existing drawer dimensions. Plan and design fully customised tool-equipped hard foam inserts adapted to your requirements in just a few clicks – either using your existing tool collection by photographing with light box no. 50537 980 or light panel no. 50537 988 and loading the images into our designer software via an SD card, or using the contour scanner no. 50537 988 to transfer the scanned contours directly into our designer software via the USB cable supplied – quick and simple. You also of course have the option of designing the hard foam inserts using new tools from our database, using photo-realistic 3D graphics. Once this is done, order the complete package online. The free Designer Software is easy to use and clearly laid out. In this way, you can make your own personal and completely unique hard foam insert quickly and easily. Planning errors are eliminated by real-time calculation, integrated contour collision testing and technical feasibility checks. Simply position each tool roughly and move it to the required location. Use the laser labeller to add your personal signature and give the hard foam insert a certain individual finish.

The software can be used to create any geometric shape.

Our systems for recording contours
For simple and rapid designing of custom hard foam inserts

We offer various options for recording the contours of tools, components and other objects directly at your location in order to produce custom hard foam inserts.

HK light panel system no. 50537 985 and HK light box no. 50537 980:

Place the tools and components on the white surface within the reference frame (556 x 556 mm) and photograph these with a digital camera. Transfer the photos produced to your computer and then load these into our designer software for hard foam inserts. The contours of the photographed tools, components or objects can be individually edited in the software and given designated recessed handles.

Use the digital camera to take pictures of your tools on the light panel, then load the pictures into the HK designer software to process and design the hard foam insert

HK contour scanner system no. 50537 988:

Tools and components placed on the scanning surface (750 x 400 mm) are scanned in a quick and simple process. The scanner can be simply connected to a PC/laptop via a USB cable. No further software needs installing. Thanks to the plug & play function, the images and contours are transferred directly to our designer software, where they are available for you to process. The scanner also records small and slender components with great precision; and with tall components, no shadows are captured and no perspective distortions result. With its compact flight case with trolley function, the scanner is mobile and can be moved around easily.

Our systems are of course also available on a lease basis. Please contact us.
Can be used to store tools and parts up to an overall height of 115 mm

Saves a great deal of time compared to conventional scanning systems with photographs

Drawer cabinet, system 700 S with 6 drawers
Depth 700 mm, width 722 mm, at a special price

Execution:
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Perforated steel sheet base (25 mm hole spacing) for fastening and fixing components
- Aluminium grip handles with paper and cellophane strips and lateral cover caps
- **Ident. No. 046:**
  - Solidly welded steel sheet construction
  - Tilt-proof due to built-in individual drawer pull-out locking
- **Ident. No. 049:**
  - Robustly welded sheet steel structure
  - Tilt-proof due to built-in individual drawer pull-out lock
  - with fork-lift compatible base

Advantage:
- Optimum operating characteristics of drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 587 mm, depth 587 mm.
Front height = FH, cabinet height = KH, see illustrations.

Technical data:
- Draw width (inner dimension): 600 mm
- Drawer depth (inner dimension): 600 mm
- Pullout type: Partial extension
- Load-carrying capacity per drawer: 100 kg
- With SOFT-CLOSE closing function: No
- Drawer surface: 0.36 m²
- Lock type: DOM® locking system
- Material of the cover panel: Plastic
- Material: Sheet steel
- Surface: Powder-coated

Roller-shutter top-mounted cabinets
Perforated rear panel, width 722 mm

Application:
Cabinet suitable for mounting on top of HK S system drawer cabinets (722 mm wide) or on tables and workbenches.

Execution:
- Robust, welded sheet steel construction with plastic roller shutters (light grey)
- Rear panel with square 10 x 10 mm perforations, axis distance 38 mm
- Integrated aluminium handle strip in roller shutter and DOM pressure cylinder lock incl. 2 keys

Advantage:
- Square 10 x 10 mm perforations in rear panel for individual attachment options, e.g. with tool hooks and support elements.
- 360 mm depth means folders, documents, boxes etc. can be stored on the cabinet floor

Delivery:
Without decorative materials, empty housing for customised fitting

Notes:
RasterPlan support elements and tool holders for inserting into perforated metal plate walls, see from no. 50638 300 in the Workplace chapter

Technical data:
- Door design: Plastic shutters
- Rear panel design: Perforated
- Central locking: Yes

ATORN® Hard foam inserts, equipped with high-quality ATORN tools
Width 293 mm, depth 587 mm, for HK drawer cabinets, system 700 S

Application:
For flexible and modular equipping of drawers from the HK drawer cabinet system 700 S and 700 B.

Execution:
- Two-tone polyethylene (PE) foam inserts equipped with tool assortments
- Closed-cell foam is resistant to most oils and chemicals
- The PE foam is lightweight, resistant, durable, odour-neutral and even food safe
- One tool insert fills half of the usable area of drawers with internal dimensions 600 x 600 mm
- Two tool inserts fill the entire usable area of drawers with internal dimensions 600 x 600 mm
- Three tool inserts fill the entire usable area of drawers with internal dimensions 900 x 600 mm

Advantage:
- Clearly arranged, organised and protected storage of tools in the drawers
- Accurately fitting cut-outs in contrasting blue make it easy to spot when tools are missing and help to prevent loss of tools
- Expensive tools can be stored securely and safely in the insert

Technical data:
- Depth: 587 mm
- Width: 293 mm
- Height: 30 mm
- Material: PE - Polyethylene
- Colour of top hard foam inlay: Black
- Colour of bottom hard foam inlay: Blue

Hard foam insert

A perfectly organised workplace increases productivity and safety in every process. For optimal performance, this perfect organisation must be maintained down to the last detail. Hard foam inserts can help: Already equipped with high-quality tools or individually planned, the inserts maintain order down to the tiniest screw. High-quality materials and the latest technology allow detailed outlines and a wide range of different cavities to be cut — always near to the surface for easy removal. Each part has its dedicated space. Hard foam inserts also secure the contents during storage and transport. The two-tone material lets you see at a glance if an item is missing.

A strong material

PE-foam is lightweight yet resilient.

Furthermore it is oil-resistant and water-resistant.

It also has shock-absorbing properties.

The hard foam is durable, odour-free and even suitable for use with foodstuffs.

ESD foam is available for electronic parts.

Use the laser engraver to add your personal signature and give the
hard foam insert an individual finish.

Versatile applications – many possibilities

The largest available hard foam insert is 1500 mm long and 1000 mm wide. Almost all dimensions and shapes smaller than this are possible.

Standard versions of the material are 30 mm, 60 mm or 90 mm thick. Individual versions are possible with smaller and larger thicknesses up to a maximum of 210 mm.

There are many colour options available. The black surface layer can be combined with the following contrasting colours: Standard blue, as well as the optional colours red, green, yellow, white or grey.

ICON RIDGE

Drawer cabinets, system 700 B – standard designs
Depth 700 mm, width 1022 mm

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Drawers with perforated steel sheet base (25 mm hole spacing) for attaching and fixing individual items
- Aluminium grip handles with paper and cellophane strips and lateral cover caps
- **Ident. No. 036:** For drawer front height 60 mm, the load capacity is 70 kg with evenly distributed load

Advantage:
- Optimum operating characteristics of drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 887 mm, depth 587 mm.
Front height = FH, cabinet height = KH, see illustrations.

Technical data:
- Draw width (inner dimension): 900 mm
- Drawer depth (inner dimension): 600 mm
- Pullout type: Full extension
- Load-carrying capacity per drawer: 100 kg
- With SOFT-CLOSE closing function: No
- Drawer surface: 0.54 m²
- Lock type: DOM® locking system
- Material of the cover panel: Plastic
- Material: Sheet steel
- Surface: Powder-coated

Designer software for hard foam inserts
The quick and easy configurator for your individual hard foam inserts

Hard foam inserts can be custom-made for tools from the current HAHN+KOLB-product range and tailored to your existing drawer dimensions. Plan and design fully customised tool-equipped hard foam inserts adapted to your requirements in just a few clicks – either using your existing tool collection by photographing with light box no. 50537 980 or light panel no. 50537 988 and loading the images into our designer software via an SD card, or using the contour scanner no. 50537 988 to transfer the scanned contours directly into our designer software via the USB cable supplied – quick and simple. You also of course have the option of designing the hard foam inserts using new tools from our database, using photo-realistic 3D graphics. Once this is done, order the complete package online. The free Designer Software is easy to use and clearly laid out. In this way, you can make your own personal and completely unique hard foam insert quickly and easily. Planning errors are eliminated by real-time calculation, integrated contour collision testing and technical feasibility checks. Simply position each tool roughly and move it to the required location. Use the laser labeller to add your personal signature and give the hard foam insert a certain individual finish.

The software can be used to create any geometric shape.

Roller-shutter top-mounted cabinets
Perforated rear panel, width 1022 mm

Application:
Cabinet suitable for mounting on top of HK B system drawer cabinets (1022 mm wide) or on tables and workbenches.

Execution:
- Robust, welded sheet steel construction with plastic roller shutters (light grey)
- Rear panel with square 10 x 10 mm perforations, axis distance 38 mm
- Integrated aluminium handle strip in roller shutter and DOM pressure cylinder lock incl. 2 keys

Advantage:
- Square 10 x 10 mm perforations in rear panel for individual attachment options, e.g. with tool hooks and support elements.
- 360 mm depth means folders, documents, boxes etc. can be stored on the cabinet floor

Delivery:
Without decorative materials, empty housing for customised fitting

Notes:
RasterPlan support elements and tool holders for inserting into perforated metal plate walls, see from no. 50638 300 in the Workplace chapter

ATORN® Hard foam inserts, equipped with high-quality ATORN tools
Width 293 mm, depth 587 mm, for HK drawer cabinets, system 700 B

Application:
For flexible and modular equipping of drawers from the HK drawer cabinet system 700 S and 700 B.

Execution:
- Two-tone polyethylene (PE) foam inserts equipped with tool assortments
- Closed-cell foam is resistant to most oils and chemicals
- The PE foam is lightweight, resistant, durable, odour-neutral and even food safe
- One tool insert fills half of the usable area of drawers with internal dimensions 600 x 600 mm
- Two tool inserts fill the entire usable area of drawers with internal dimensions 600 x 600 mm
- Three tool inserts fill the entire usable area of drawers with internal dimensions 900 x 600 mm

Advantage:
- Clearly arranged, organised and protected storage of tools in the drawers
- Accurately fitting cut-outs in contrasting blue make it easy to spot when tools are missing and help to prevent loss of tools
- Expensive tools can be stored securely and safely in the insert

Technical data:
- Depth: 587 mm
- Width: 293 mm
- Height: 30 mm
- Material: PE - Polyethylene
- Colour of top hard foam inlay: Black
- Colour of bottom hard foam inlay: Blue

ICON RIDGE

ATORN® Hard foam inserts, equipped with high-quality ATORN tools
Width 293 mm, depth 587 mm, for HK drawer cabinets, system 700 B

Application:
For flexible and modular equipping of drawers from the HK drawer cabinet system 700 S and 700 B.

Execution:
- Two-tone polyethylene (PE) foam inserts equipped with tool assortments
- Closed-cell foam is resistant to most oils and chemicals
- The PE foam is lightweight, resistant, durable, odour-neutral and even food safe
- One tool insert fills half of the usable area of drawers with internal dimensions 600 x 600 mm
- Two tool inserts fill the entire usable area of drawers with internal dimensions 600 x 600 mm
- Three tool inserts fill the entire usable area of drawers with internal dimensions 900 x 600 mm

Advantage:
- Clearly arranged, organised and protected storage of tools in the drawers
- Accurately fitting cut-outs in contrasting blue make it easy to spot when tools are missing and help to prevent loss of tools
- Expensive tools can be stored securely and safely in the insert

Technical data:
- Depth: 587 mm
- Width: 293 mm
- Height: 30 mm
- Material: PE - Polyethylene
- Colour of top hard foam inlay: Black
- Colour of bottom hard foam inlay: Blue

ICON RIDGE 1675

Drawer cabinets, system 800 S – standard designs
Depth 800 mm, width 722 mm

Execution:
- Solidly welded steel sheet construction
- Tilt-proof due to built-in individual drawer pull-out locking
- The drawers have high-quality Delrin rollers which means that they run quietly
- Drawers with slots all around for inserting compartment rails and dividers
- Drawers with perforated steel sheet base (25 mm hole spacing) for attaching and fixing individual items
- Aluminium grip handles with paper and cellophane strips and lateral cover caps
- **Ident. No. 021–032:** Load capacity of 100 kg with a drawer front height of 90 mm
- **Ident. No. 041–042:** Load capacity of 70 kg with a drawer front height of 60 mm and 100 kg with a drawer front height of 90 mm

Advantage:
- Optimum operating characteristics of drawers
- High quality - made in Germany

Notes:
To order customised hard foam inserts, please use the following clear internal dimensions: Width 587 mm, depth 687 mm.

Front height = FH, cabinet height = KH, see illustrations.

Suitable floor or wall anchoring is necessary if the individual drawers are loaded with 200 kg with the weight evenly distributed. Otherwise, drawers may be loaded to max. 150 kg with evenly distributed weight to ensure the structural integrity of the cabinet.

Technical data:
- Draw width (inner dimension): 600 mm
- Drawer depth (inner dimension): 700 mm
- Pullout type: Full extension
- Load-carrying capacity per drawer: 200 kg
- With SOFT-CLOSE closing function: No
- Drawer surface: 0.42 m^2
- Lock type: DOM® locking system
- Material of the cover panel: Plastic
- Material: Sheet steel
- Surface: Powder-coated

Roller-shutter top-mounted cabinets
Perforated rear panel, width 722 mm

Application:
Cabinet suitable for mounting on top of HK S system drawer cabinets (722 mm wide) or on tables and workbenches.

Execution:
- Robust, welded sheet steel construction with plastic roller shutters (light grey)
- Rear panel with square 10 x 10 mm perforations, axis distance 38 mm
- Integrated aluminium handle strip in roller shutter and DOM pressure cylinder lock incl. 2 keys

Advantage:
- Square 10 x 10 mm perforations in rear panel for individual attachment options, e.g. with tool hooks and support elements.
- 360 mm depth means folders, documents, boxes etc. can be stored on the cabinet floor

Delivery:
Without decorative materials, empty housing for customised fitting

Notes:

ℹ️ Hard foam insert

A perfectly organised workplace increases productivity and safety in every process. For optimal performance, this perfect organisation must be maintained down to the last detail. Hard foam inserts can help: Already equipped with high-quality tools or individually planned, the inserts maintain order down to the tiniest screw. High-quality materials and the latest technology allow detailed outlines and a wide range of different cavities to be cut — always near to the surface for easy removal. Each part has its dedicated space. Hard foam inserts also secure the contents during storage and transport. The two-tone material lets you see at a glance if an item is missing.

A strong material

PE-foam is lightweight yet resilient.

Furthermore it is oil-resistant and water-resistant.

It also has shock-absorbing properties.

The hard foam is durable, odour-free and even suitable for use with foodstuffs.

ESD foam is available for electronic parts.

Use the laser engraver to add your personal signature and give the hard foam insert an individual finish.

Versatile applications – many possibilities

The largest available hard foam insert is 1500 mm long and 1000 mm wide. Almost all dimensions and shapes smaller than this are possible.

Standard versions of the material are 30 mm, 60 mm or 90 mm thick. Individual versions are possible with smaller and larger thicknesses up to a maximum of 210 mm.

There are many colour options available. The black surface layer can be combined with the following contrasting colours: Standard blue, as well as the optional colours red, green, yellow, white or grey.

ICON RIDGE

HK-MAT tool distribution system

application:
thanks to the electronically locked tool dispensing cabinet, the right tool is always provided at the right time at the right place. personalised access with PIN entry allows only authorised personnel to have controlled access to your tools around the clock. automatic re-ordering after removal guarantees restocking. this eliminates tool-related production downtime. procurement and storage costs are minimised.

advantages:

- full cost and consumption control
- comprehensive evaluation options
- full availability ensures high productivity
- in a consignment warehouse, the supplier retains the ownership of the goods until the customer withdraws the products
- only pay for products that have been genuinely removed
- reduction of excess stocks
- true inventory, 'concealed' inventories are minimised
- quick access without warehouse management
- prevention of wastage
- individual removal possibility, e.g. of reversible tips from entire packing units
- 24h availability
- no more tedious searching for the right tool
- immediate information where a tool is currently in use (e.g. measuring equipment/rented items)
- non manufacturer-specific device, can be filled with items from different suppliers
- minimisation of storage costs
- no more manual orders: email sent automatically to suppliers when a tool is removed
- interfaces with PPS and ERP systems
- expandable with all modules of the HK-MAT series

easy selection of the required tool on the PC, controlled and documented tool distribution

our service:
we will prepare an individual cost model for you encompassing rental and a contractually agreed increase in sales tailored to your requirements.
please contact us. ☎ **hotline +49 (0)800 9813-187**

no more tedious searching for tools

find the desired tool quickly using a simple search function. the software provides an overview of the tool stock and automatically triggers orders.

Hard foam insert

A perfectly organised workplace increases productivity and safety in every process. For optimal performance, this perfect organisation must be maintained down to the last detail. Hard foam inserts can help: Already equipped with high-quality tools or individually planned, the inserts maintain order down to the tiniest screw. High-quality materials and the latest technology allow detailed outlines and a wide range of different cavities to be cut — always near to the surface for easy removal. Each part has its dedicated space. Hard foam inserts also secure the contents during storage and transport. The two-tone material lets you see at a glance if an item is missing.

A strong material

PE-foam is lightweight yet resilient.

Furthermore it is oil-resistant and water-resistant.

It also has shock-absorbing properties.

The hard foam is durable, odour-free and even suitable for use with foodstuffs.

ESD foam is available for electronic parts.

Use the laser engraver to add your personal signature and give the
hard foam insert an individual finish.

Versatile applications – many possibilities

The largest available hard foam insert is 1500 mm long and 1000 mm wide. Almost all dimensions and shapes smaller than this are possible.

Standard versions of the material are 30 mm, 60 mm or 90 mm thick. Individual versions are possible with smaller and larger thicknesses up to a maximum of 210 mm.

There are many colour options available. The black surface layer can be combined with the following contrasting colours: Standard blue, as well as the optional colours red, green, yellow, white or grey.

Modular organisation system
Textured mats and boxes

This insert system **is designed for universal use** for tool cabinets, shelves, workbenches, workshop trolleys, cases or for the storing and providing small parts.
The organisation system in high-quality black **ABS plastic** comprises several modules **in 24 and 48 mm heights.**
They can be used side-by-side, one behind the other and **one on top of the other** as required. The ABS plastic is resistant to oil, petrol, greases, acids and bases.
The textured mat ensures excellent grip of the modules and can be cut to any size.
Advantages: clearly arranged, individual, flexible, specific, versatile, non-slip, robust, stackable, time-saving, portable
| Measure | Cut the plate | Break over the edge | Glue plate in place | Insert boxes as required |
Upon request: Boxes available in light grey

AQURADO® Textured mat
For HK drawer cabinet, systems 550/700/800 S and B

Application:
For inserting in drawers of HK drawer cabinets for use with AQURADO modules.

Execution:

Roller-shutter top-mounted cabinets
Rear panel with square perforations, with width options of 722 mm or 1022 mm

RAL

Application:
Ident. No. 002–005: Cabinet suitable for mounting on top of HK S system drawer cabinets (722 mm wide) or on tables and workbenches.
Ident. No. 012–015: Cabinet suitable for mounting on top of HK B system drawer cabinets (1022 mm wide) or on tables and workbenches.

Execution:
- Robust, welded sheet steel construction with plastic roller shutters (light grey)
- Rear panel with square 10 x 10 mm perforations, axis distance 38 mm
- Integrated aluminium handle strip in roller shutter and DOM pressure cylinder lock incl. 2 keys

Advantage:
- Square 10 x 10 mm perforations in rear panel for individual attachment options, e.g. with tool hooks and support elements.
- 360 mm depth means folders, documents, boxes etc. can be stored on the cabinet floor

Delivery:
Without decorative materials, empty housing for customised fitting

Notes:
RasterPlan support elements and tool holders for inserting into perforated metal plate walls, see from no. 50638 300 in the Workplace chapter

Technical data:
- Door design: Plastic shutters
- Rear panel design: Perforated
- Central locking: Yes
- Lock type: DOM® cylinder lock
- Material: Sheet steel
- Colour of front: Light grey
- Surface: Powder-coated

Heavy-duty cabinets without centre divider – width 1085 mm – load-bearing capacity of 1200 kg
with options of solid sheet metal doors or doors with viewing window, with shelves

MADE IN

Application:
For storing heavy materials, tools, stored goods, forming and stamping dies.

Execution:
- extremely robust and solid welded sheet steel construction with reinforced mounting profiles
- sheet steel shelves, galvanised, height-adjustable in 30 mm grid
- reinforced hinged doors, door opening angle 270°
- lockable with cylinder lock and rotary bolt lock with 3-point latching

Advantage:
- large storage space for bulky operational materials or heavy stored goods
- heavy parts are cleared and stored securely and conveniently
- extremely strong owing to high load capacity

Delivery:
fully assembled including floor anchoring

Notes:

RasterPlan von Kappes
Heavy-duty cabinets without centre divider – height 1950 mm – load-bearing cap. 1650 kg
with options of solid sheet metal doors or doors with viewing window, with drawers and shelves

Application:
For a total loading capacity of up to 1.65 t for very heavy loads, particularly suitable for storage of the heaviest tools, such as embossing and punching dies.

Execution:
- Extremely stable welded steel structure with brazed corners, with or without central partition
- Smooth fronts due to flush overlay doors, opening angle more than 200°, continuous rod guiding
- Doors can be locked simultaneously with a triple-point security cylinder lock, incl. 2 keys
- Cabinet base can carry a load of up to 400 kg

Delivery:
Additional door designs, e.g. perforated or slotted panel doors and sidewall lining, pull-out blocks for drawers and suitable insert material with compartment dividers, additional group or main keys and further paint colours deliverable upon request.

Notes:
Floor anchoring (ident. no. 50047 400) is recommended.

Technical data:
- With partition wall: No
- Load-carrying capacity per shelf: 160 kg
- Shelf width: 1000 mm
- Shelf depth: 600 mm
- Load-carrying capacity: 1650 kg
- Central locking: Yes

Heavy-duty cabinets without centre divider – height 1110 mm – load-bearing cap. 1650 kg
with solid sheet metal doors, with drawers and shelves

RasterPlan von Kappes

Application:
For a total loading capacity of up to 1.65 t for very heavy loads, particularly suitable for storage of the heaviest tools, such as embossing and punching dies.

Execution:
- Extremely stable welded steel structure with brazed corners, with or without central partition
- Smooth fronts due to flush overlay doors, opening angle more than 200°, continuous rod guiding
- Doors can be locked simultaneously with a triple-point security cylinder lock, incl. 2 keys
- Cabinet base can carry a load of up to 400 kg

Delivery:
Ident. No. 221–222: Additional door designs, e.g. perforated or slotted panel doors and sidewall lining, pull-out blocks for drawers and suitable insert material with compartment dividers, additional group or main keys and further paint colours deliverable upon request.

Ident. No. 223: Additional door designs, e.g. perforated or slotted panel doors and sidewall lining, drawer locks and suitable insert materials with compartment dividers, additional group key or main keys and further paint colours deliverable on request.

Notes:
Floor anchoring (ident. no. 50047 400) is recommended.

Technical data:
- With partition wall: No
- Load-carrying capacity per shelf: 160 kg
- Load-carrying capacity: 1650 kg
- Central locking: Yes
- Lock type: Twist-grip lock with three-point fastening
- Material: Sheet steel
- Surface: Powder-coated

ICON RIDGE **1705**

Multi-purpose cabinet with divider, clothes rails and hat shelf
With partition, height 1800 mm

Application:
For secure and clearly arranged storage of clothing and headgear.

Execution:
- Stable spot-welded steel sheet metal structure with base 50 mm high
- Smooth, overlay-type doors (noise reduction through rubber pads), with integrated reinforcement, hinged on the left and right
- Smooth shelves without raised edges make the lockers easy to clean, ventilation provided by means of holes in the rear wall
- Doors lock separately with cylinder security lock, incl. 2 keys

Technical data:
- Number of shelves: 2 PCS
- Load-carrying capacity per shelf: 30 kg
- Load-carrying capacity: 125 kg
- With partition wall: Yes
- Central locking: No
- Lock type: Cylinder lock
- Material: Sheet steel
- Surface: Lacquered

ICON RIDGE

Sliding door cabinets with solid sheet metal doors or doors with viewing window, height 1000 mm, 1200 mm and 1950 mm

## With shelves, load capacity 80 kg per shelf

Execution:

- Stable welded sheet steel structure with base, available in three different heights, widths and depths
- Galvanised shelves, height-adjustable in increments of 17 mm, load capacity per shelf 80 kg with evenly distributed weight
- Sliding doors with reinforcement pockets and recessed handle, guide rail with special rollers and anti-crush protection, cushioned end stops
- Doors can be locked simultaneously with a push and turn cylinder lock, incl. 2 keys

Advantage:

- Space-saving sliding doors: ideal for use in confined and narrow spaces

Delivery:

Available on request: DOM locking system (fits HK tool cabinets, HK tool shelves, HK workbenches) and other paint finishes.

Technical data:

- Load-carrying capacity per shelf: 80 kg
- Lock type: Cylinder lock
- Material: Sheet steel
- Surface: Powder-coated

Sliding door cabinets with solid sheet metal doors, height 1030 mm and 1950 mm
With drawers and shelves, carrying capacity 50/60 kg

Application:
For secure and clearly-visible storage of tools, accessories, files or many other parts.

Execution:
- Housing made of welded sheet steel construction
- Doors edged and reinforced
- Security lock for safe locking of the cabinets
- Rails plugged in to enable rapid conversion
- Grid system: Shelves and drawers adjustable in increments of 30:30 mm
- **Ident. No. 507–508, 521–525:** Additional equipment options with:
- Drawers with front height 90 and 150 mm, width x depth 886 x 395 mm, see no. 50053 600-615, shelves fixed or removable, see no. 50053 620-635
- **Ident. No. 517–518:** Additional equipment options with:
- drawers with 90 mm and 150 mm front heights, width x depth 884 x 395 mm, see no. 50053 700-715, shelves fixed or removable, see no. 50053 720-735

Advantage:
- All components with a given width can be optionally combined with each other
- Space-saving sliding doors: ideal for use in confined and narrow spaces

Notes:
See following pages for accessories for additional customisation

Technical data:
- With partition wall: Yes
- Load-carrying capacity per shelf: 60 kg
- Lock type: Cylinder lock
- Material: Sheet steel
- Surface: Powder-coated

TUREX sanding disc storage in storage frame
Tilting swivel arms, with swing-out prevention and mounting spigots

Do you have problems storing your sanding discs? We have the solution!
There are 5 different designs and sizes that cover the sanding disc range from Ø 300 mm to Ø 1100 mm as well as sanding disc weights up to 350 kg.

Damage during storage and transport are therefore problems of the past.
The sanding discs are mounted on support arms that can be swivelled out from the frame by approx. 135° and tilted by 90°. Very easy to move thanks to needle bearing. Each arm supports a standard aluminium mounting spigot. Mounting spigots adapted to the corresponding flange bores are deliverable at a surcharge. Sanding discs are tipped down and back with little effort as the discs are mounted exactly on their centres of gravity. Sanding discs can be effortlessly turned around their own axes to bolt the mounts onto the hoist. A lever on each arm secures the sanding disc when tilted down or swivelled back. The number of support arms depends on the thickness of the sanding disc. The basic model of the sanding disc magazine features 6 arms with mounting spigots. Other versions available on request. Floor anchoring required.

Sanding disc dimensions must be stated as shown in the drawing below to determine the appropriate sanding disc magazine for your purposes.

Fill in our questionnaire on storing sanding discs (www.hahn-kolb.de/downloadcenter or scan QR code) and send it to us with your request.

Open version in the storage-rack, with fold-down pivoting arms:

Tilting swivel arms with swing-out prevention

Sanding discs are tipped down and back with little effort as the discs are mounted exactly on their centres of gravity.

A lever on each arm secures the sanding disc when tilted down or swivelled up.
