BenQ

DuoBoard

By combining two DuoBoards together, users can extend their collaboration space, fostering teamwork and stimulating innovation.

OPS Module

The Optional Open Pluggable Specification offers the flexibility of supporting different videoconferencing solutions.

AMS System

DuoBoard supports multi-account management through NFC technology, which allows users to manage their personalized workspace without using a password.

Video Conferencing

Pre-loaded with apps to make online meetings simple. With a one-click-to-start interface, you can host a high quality video conference by connecting various devices.

Germ Resistant Screen

Multilayer coating of non-toxic, long lasting ionic silver nano agent kills most bacteria on contact, effectively blocking the spread of germs.

Flexible Annotation

EZWrite 5 streamlines discussions by letting users share notes and ideas from anywhere.
