

K-12 and Higher Education

Technology is becoming more woven into the framework of the classroom and as a result the way we approach education is changing. Google has supported this shift by creating a new device that completely innovates the most utilized tool in the classroom... the whiteboard.

Google Jamboard

Jamboard is a fun, 55" 4k digital whiteboard with cloud connectivity and G Suite integration. The display is responsive and accurate, and feels as natural as writing on a traditional whiteboard. Intuitive drawing and writing tools make Jamboard easy to use for educators and kids of all ages.

Intuitive drawing tools allow sketching and writing to feel natural

Use Google Search and Google Image Search to add web content to your Jam

Team members can join and collaborate in real time with the Jamboard app

K - 12

A class taught with Jamboard is fun and interactive for all students - from kindergarteners just beginning their education to students in their senior year of high school.

The intuitive tools are simple to learn and the various drawing, writing, and sketching options encourage creativity. With cloud connectivity, teachers can add images and web content from Google Search to the board. Jamboard auto-saves a copy of your Jam session in Google Drive, so you can come back to it later. If a teacher wants to reference a diagram they drew or notes they took in yesterday's lesson, the Jam can be pulled back up from Google Drive, just the way they left it. No one has to write "DO NOT ERASE" ever again.

The 1:1, student to laptop ratio is standard in many K-12 classrooms and the schools that are supplying these laptops are choosing Chromebooks. Google Chromebooks are the number one laptop sold to US K-12 Schools. Educators are drawn to Chromebooks because of the simple interface and G Suite integration. The Jamboard app can easily be downloaded onto Chromebooks alongside the other G Suite apps (Docs, Gmail, Sheets). With the app, students can join the Jam and place images and notes on the board from any device. The app allows students to go beyond just being spectators in the classroom, but active participants. Using Jamboard in the classroom increases engagement and gives students a chance to be more involved in what they are learning.

Google Jamboard for primary & secondary education

Jamboard brings the timeless form factor of the whiteboard to the cloud. Elevate collaborative education, whether you're working together in a group seminar setting or looking to make distance learning more engaging.

- Visible, accessible learning**
Jamboard is an engaging, natural feeling interactive canvas for young students to express themselves at school.
- Formative assessment**
Jams are perfect for iterative and asynchronous work. Mark, frame, Jams and commenting track ideas as they come to life.
- Easy saving and sharing**
All your work is saved in Google Drive and you Jams also retain their interactivity, so you group can pick up right where you left off and your ideas are not erased away.
- Make real world connections**
Bring a whole world of web into classrooms with Google Search or invite outside contributors and experts to co-author work with students.
- Portable and quick setup**
It's easy to move between classrooms or study spaces, with just a single cable for power. Everything else is wireless, so you can start jamming right away.
- Intelligent features**
Machine learning enables assistive handwriting, object and drawing recognition so everyone can contribute confidently.

Cutting-edge hardware and software designed for today's dynamic classroom

- 55" 4K UHD display
- 120 Hz touch scan rate
- 60 Hz video refresh rate
- HDMI 2.0, USB Type C, 2 X USB 3.0
- SPDIF audio out
- WiFi 802.11ac 2x2, NFC
- 1 Gigabyte Ethernet
- Google Cast
- Built in tilt support
- Built in wide angle camera
- Down firing speakers
- Built in microphones
- 15 simultaneous touch points
- Handwriting and shape recognition
- 2 X Fine tip passive stylus
- Eraser
- Microfiber cloth
- Wall mount**
- Rolling stand**

Higher Ed

Higher education is an immersive learning experience. Students learn from their professors but also from the large, diverse group of peers surrounding them. Google Jamboard connects the classroom to create a collaborative and engaging environment.

Jamboard allows real time co-authoring across devices. During open discussions and talking through larger ideas, students can open the Jamboard app from their tablets and phones and the written responses, images, and sticky notes they post will pop up on the Jamboard in real time.

With Jamboard, lecturers don't have to switch between presenting information on slides and writing notes on the whiteboard. G Suite integration allows you to pull images, documents, and slides from your Google Drive and place them on the Jamboard screen. You can then use any of Jamboard's drawing or writing tools to annotate and sketch on the board.

Using Google Hangouts, you can video conference in guest lecturers and speakers and project the Jamboard screen into the Hangout. Students taking a sick day can view the lesson from their dorm and see the notes being written on the board. Universities have used Google Jamboard alongside other Google video conferencing tools to host one course, on several different campuses at one time.

Google Jamboard for higher education

A collaborative, digital whiteboard built for the modern classroom

Jamboard brings the timeless form factor of the whiteboard to the cloud. Elevate collaborative education, whether you're working together in a group seminar setting or looking to make distance learning more engaging.

- A forum for ideas**
Transform group work with creative drawing tools and the best of the web with Google Search. Add existing group work to your Jam directly from Google Drive.
- Better collaboration**
Jam from a single, streaming group camera, just like Google Docs. Real-time co-editing whether on a board, or via the app encourages collaboration.
- Easy saving and sharing**
All your work is saved in Google Drive and your jams also retain their connectivity, so your group can pick up right where you left off and your ideas are not erased away.
- Great for distance learning**
Students can learn and interact wherever they are with the Jamboard app. Add ideas, comments and watch the Jam grow from tablet or mobile.
- Portable and quick setup**
It's easy to move between classrooms or study spaces, with just a single cable for power. Everything else is wireless, so you can start jamming right away.
- Intelligent features**
Machine learning enables assistive handwriting, object and drawing recognition so everyone can contribute confidently.
