# PELICAN MOUNTAIN PRESCRIBED FIRE

---

## 2018 PRESCRIBED FIRE

During the 2018 wildfire season, Alberta Agriculture and Forestry may be conducting one or more prescribed fires approximately 12.5 kilometres southwest of Sandy Lake. The exact location of the prescribed fire area is directly north of Kilometre 123 on the C-Road.

The prescribed fires will vary in size from 1 to 5 hectares and burning will take place when forecasted weather and on-the-ground conditions allow for a safe, controlled burn.

Smoke may be visible at times but will be localized and short lived. Public roads and highways are expected to remain open; however, traffic may be controlled. Watch for Prescribed Fire in Progress and Smoke signage near the area.

The purpose of these prescribed fires is to examine fire behaviour in various FireSmart treatments.
