

At a Glance

2 day workshop

Available for 15 to 200 people

Explore gnarly challenges in a new, structured way

Challenge organizational knowledge and assumptions

Build internal innovation muscles

Shift culture through application to real projects

Delivered by an ExperiencePoint trained Facilitator

Experience a better way to innovate.

ExperienceInnovation™ | Apply accelerates your people's journey toward *design thinking* mastery by having them apply new techniques and mindsets in cycles of graduating complexity with graduating risk. Your real organizational challenge becomes their focus for a two-day sprint that includes field work with live customers!

ExperienceInnovation™ | Apply combines digital, video, and physical tools to guide people through a journey of uncovering new insights. From observing users to build empathy and creating learning-oriented experiments, to conducting user interviews and transforming insights into opportunities, your people will apply the skills necessary to approach problems in a more meaningful and impactful way.

Outcomes

- Make meaningful progress on real challenges
- Develop a common language for innovation
- Capability and confidence with essential design approaches
- Produce new insights for stubborn challenges
- Integrate design thinking into your work culture
