

Global Cloud Based Development

The Microsoft Azure Consulting and Managed Services by delaPlex provide end-to-end services for Azure readiness assessment, strategy development, application development, migration and ongoing managed application services.

delaPlex uses the various services from the Azure suite to quickly build, deploy and manage applications across a global network of Microsoft-managed datacenters.

The Microsoft Azure cloud computing platform has a wide range of choices with different development languages and platforms. Azure Storage is cloud storage that provides customers

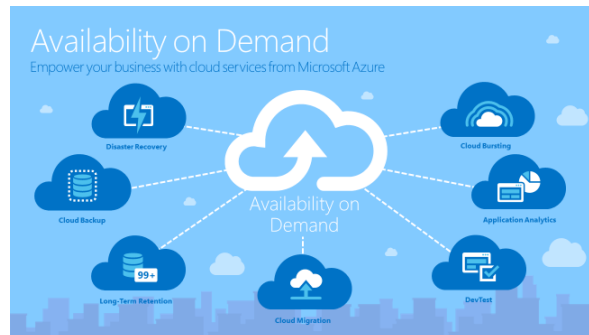

with anywhere and anytime access. Azure SQL delivers predictable performance at multiple service levels, dynamic scalability with no downtime and zero administration.

The Microsoft Azure Platform provides a familiar and flexible environment to drive and support specific needs and services of the development team, customers and users. The platform also provides a uniform experience as it enables developers and users to use existing Microsoft technologies to develop or use applications on premise or in the cloud.

Improve Operations & Reduce Risk Build, Test, Rescue, and Deploy Better Code

delaPlex has built a trusted reputation developing mobile, cloud, and commercial application software for sale by vendors (ISV), and “software-centric” companies that depend on continuous software development to drive revenue and growth. delaPlex has years of experience on analyzing, designing, consulting, deploying and managing high end applications.

The client list of delaPlex is from variety of industries, including telecommunications, energy, healthcare, media/publishing, entertainment, and manufacturing. Our clients have come to recognize that delaPlex has the technical expertise and product experience needed to better compete in today’s markets.

We Solve Problems

- *Dedicated* team committed to your vision
- *Flexible* resources that adjust with your needs
- *Driven* partner that delivers results and value
- *Reliable* solution for fixed development costs
- *Innovative* holistic business model
