

Targeted Care Management Programs by Health Risk

Hospice/Palliative Care

Home Care Management - End Stage

Provides in-home medical and palliative care management by Specialized Physicians, Nurse Care Managers, and Social Workers for chronically frail seniors that have physical, mental, social, and financial limitations that limits access to outpatient care, forcing unnecessary utilization of hospitals.

High-risk Clinics and Care Management

Intensive one-on-one physician/nurse patient care and case management for the highest risk, most complex of the population. As the risk for hospitalization is reduced, patient is transferred to Level 2. Physicians and Care Managers are highly trained and closely integrated into community resources, physician offices or clinics.

Complex Care and Disease Management

Provides long-term whole person care enhancement for the population using a multidisciplinary team approach.
Diabetes, COPD, CHF, CKD, Depression, Dementia.

Self-management, PCP

Provides self-management for people with chronic disease.

Population Monitoring

Preventive care, education and monitoring for the community.
