

# CMMS

## BEST TOOL

## IN THE TOOLBOX

### More Useful than Duct Tape

Review tickets. Generate, assign, and track work orders. Schedule preventive maintenance. Add meter- and time-based floating or fixed PMs. Track inventory. Manage third-party vendors. Autogenerate KPI-filled reports.

### Lighter than a Hammer

Right from the mobile device in your back pocket: every work order, checklist, manual, schematic, and floor plan. Complete asset histories. Current inventory levels. Contact info for every vendor.

### Safer than a Table Saw

Not only are your fingers safe, so is your data. Thanks to cloud computing, everything is stored, patched and updated behind the scenes. Multiple back-ups mean you never lose your data.
