CMMS

Life as a maintenance professional

doesn't have to be

difficult

*We spoke to some of our
customers to understand
what life as a maintenance
professional
is like...*

This is what they said...

Maintenance professionals
struggle with..

Work orders
not being

tracked

Lack of accountability

among
maintenance staff

Inability

to track performance
and work progress

Critical data and information
don't exist or are
not easily accessible

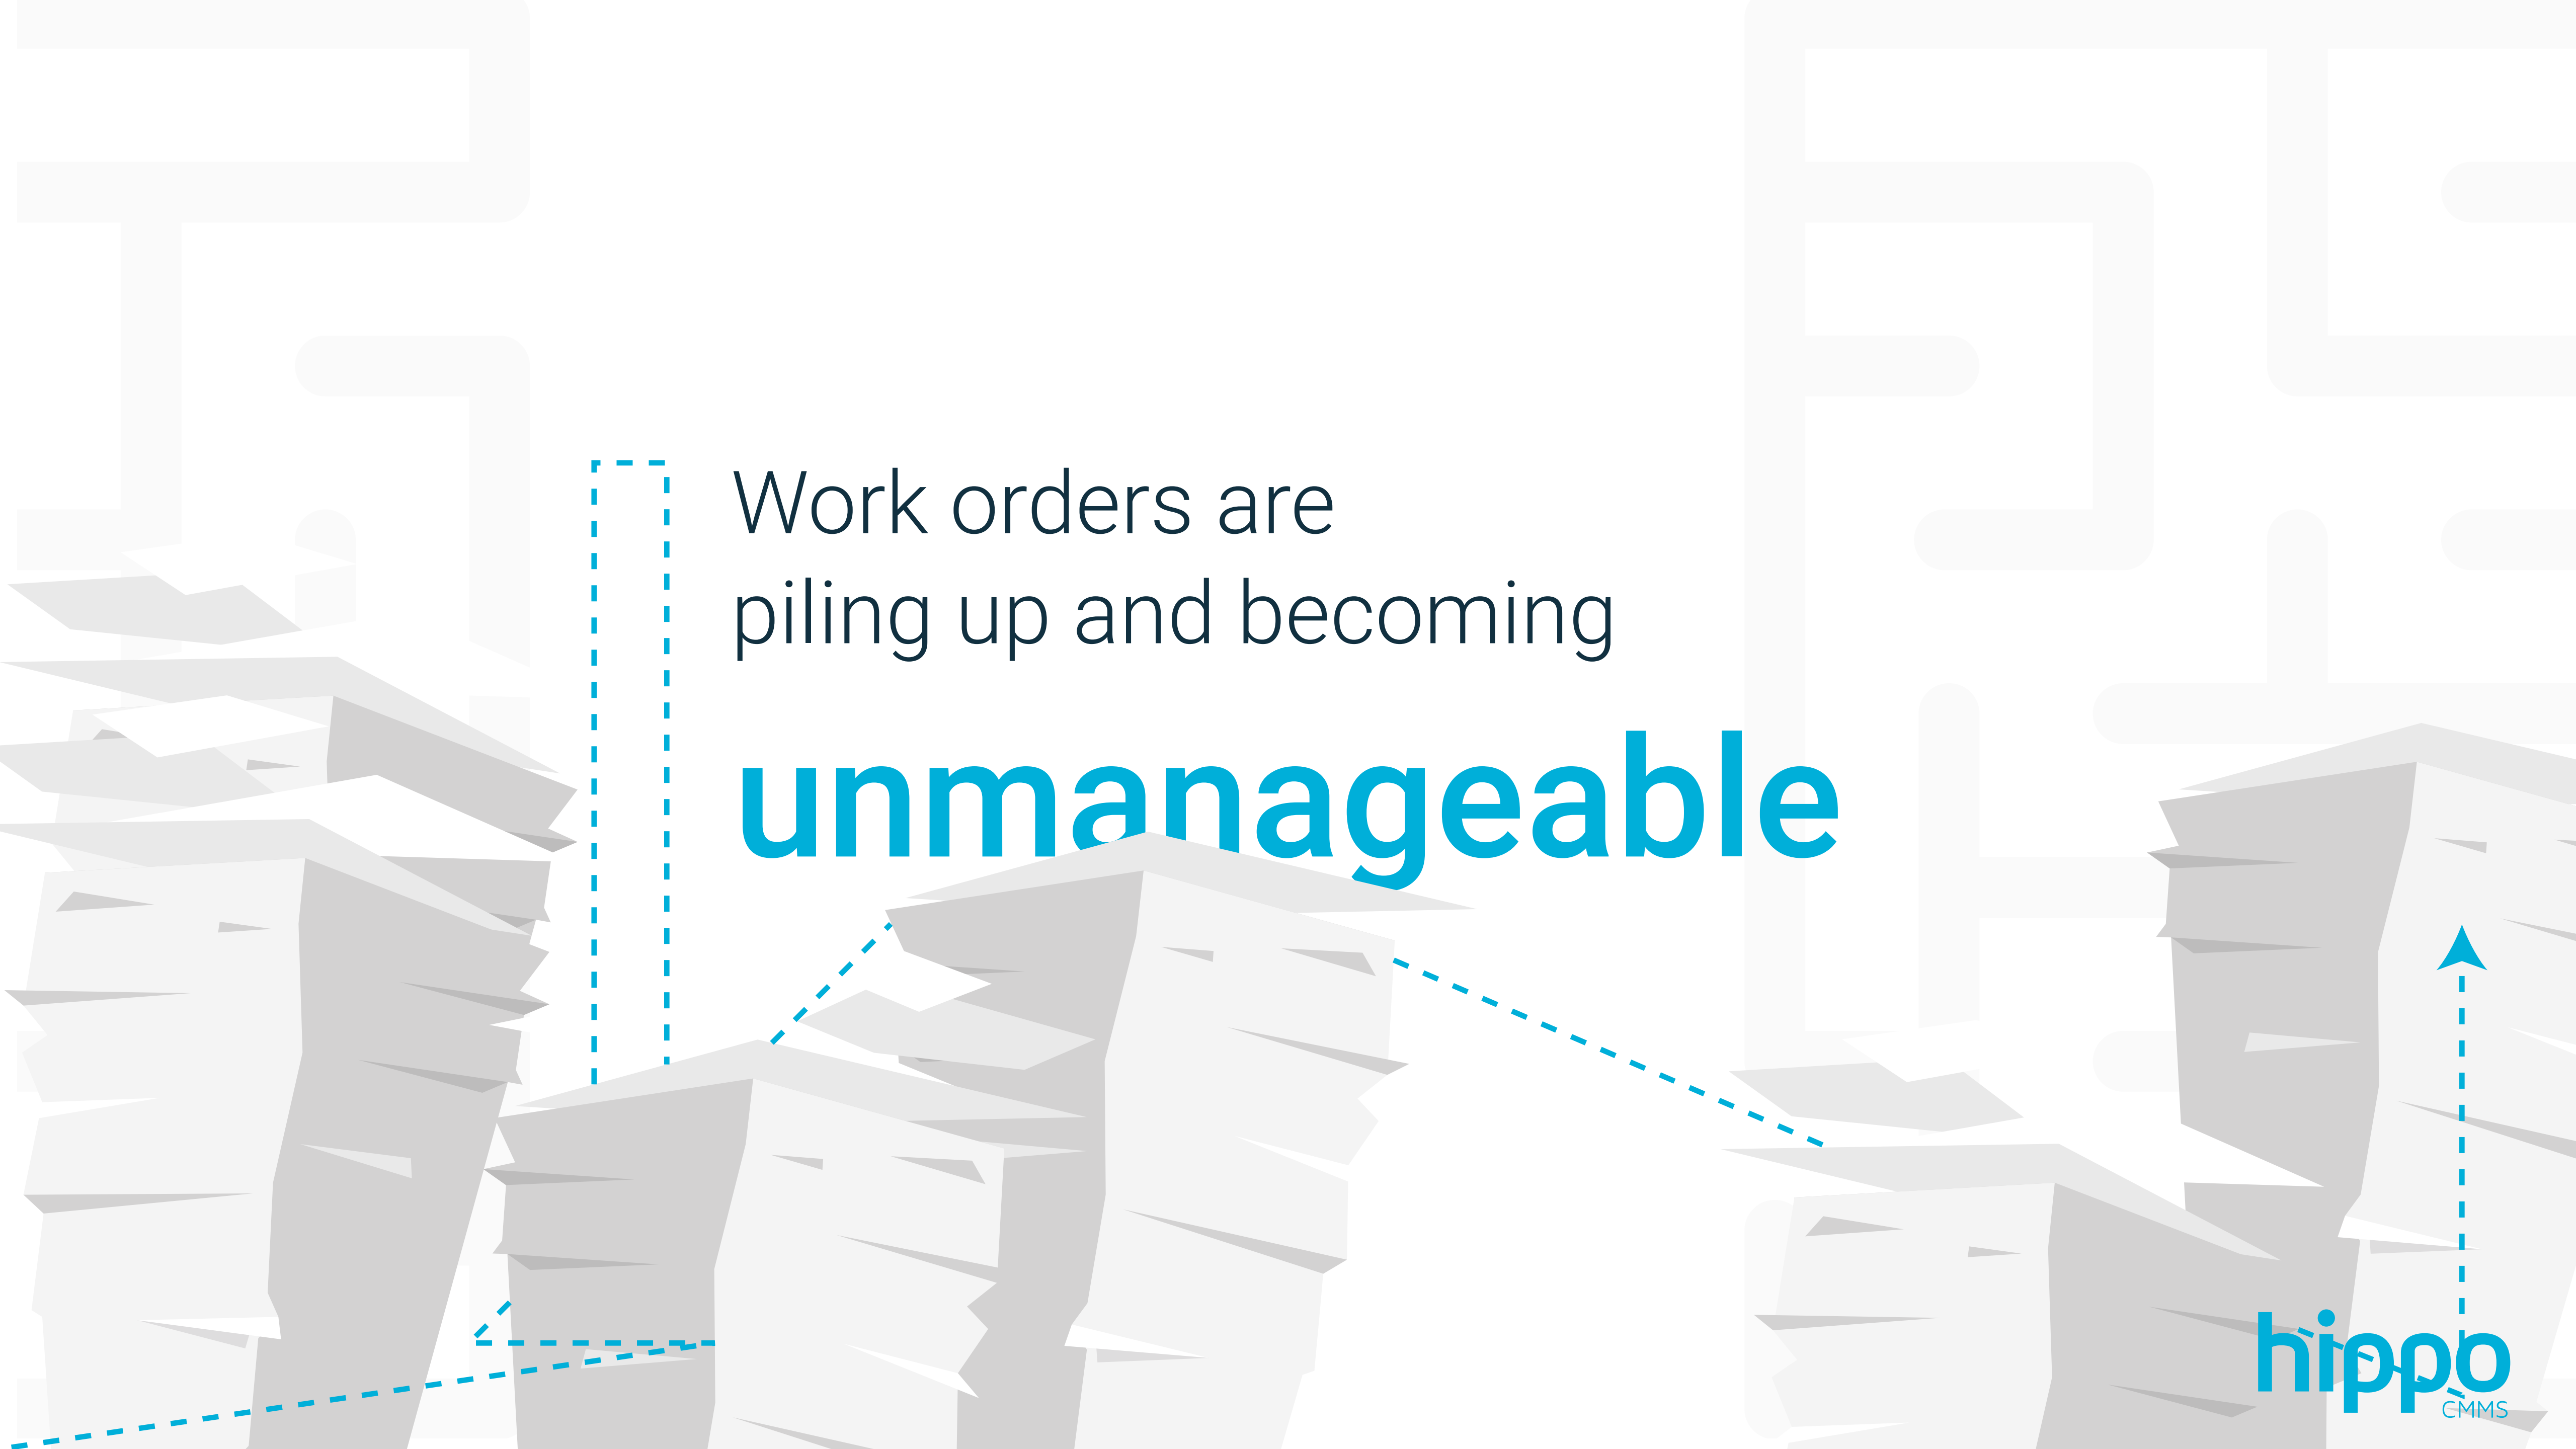

Frequent **equipment
downtime**
and repairs

THE SEARCH FOR A SOLUTION

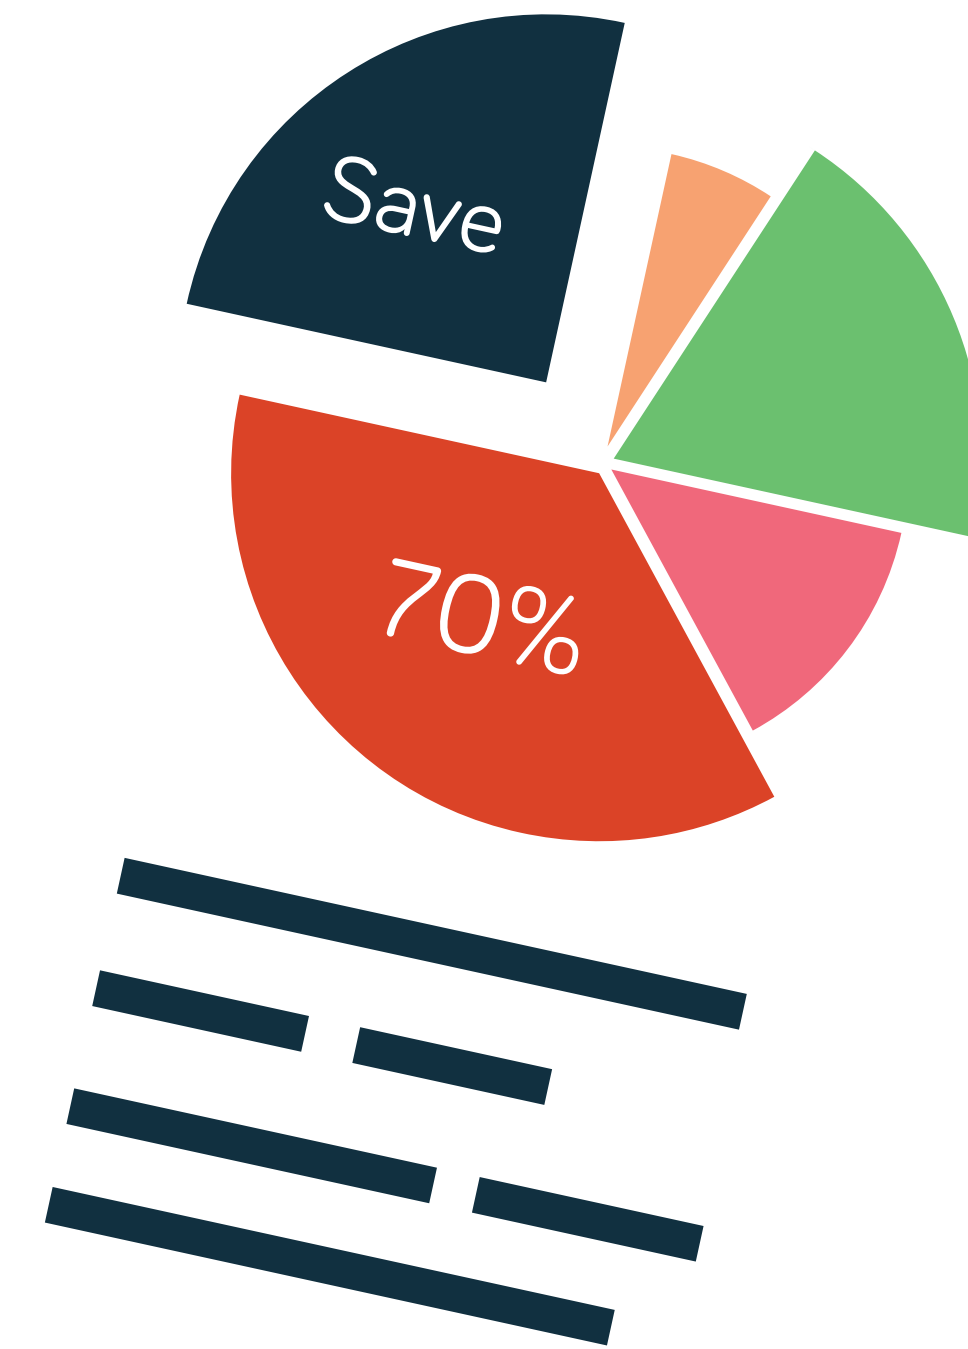

Why existing maintenance management procedures and processes aren't working?

Work orders are
piling up and becoming

unmanageable

As the company and
maintenance department grew,

accountability became an issue

A light gray maze graphic serves as the background for the slide. It features a complex network of paths and dead ends, with some paths highlighted in blue dashed lines. The central text is positioned within the maze.

Productivity is decreasing
while equipment and labor
costs are increasing

2017

Is this really
acceptable

in

2018?

2018

THE ROAD TO A SOLUTION

Why Hippo CMMS is a great solution for overcoming
