

# EASYCONFERENCE MOBILE AND EASYMEETING DESKTOP CLIENT

Finally, a video client developed to put usability first and technology in the background.

You no longer have to worry about the technology, and instead spend your time and money wisely and enjoy doing the things that inspire you the most.

Apps are available for both Android and iOS smartphones and tablets. Desktop Clients available for Mac OS and Windows.

## Personal EasyNumber

Video calling easy as a phone call. Search and be found in the global video directory. Share your EasyNumber in your signature, meeting invitations or add it as click-to-dial-buttons on your web.

**Connect with any device**  
Designed to work with all major brands and services on the market (H323/SIP).

Clients available for Windows, Macintosh, and for Android and iOS smartphones/tablets.

## Simple setup

No configuration is needed. We recommend installing the Windows or Macintosh Client for optimal user experience, although our service are optimized for Google Chrome browsers.

## Customer Support

Get friendly, live support from our Experts to ensure high-quality video calling experiences on your Easymeeting Desktop client.

## Link My Endpoint (LiME)

Link your endpoint, and forward incoming calls to your company's video conferencing system. Transform your application into a personal remote control for your video conferencing system.

## Click To Dial

Allow your contacts to easily call you with a click of a button. Copy your meeting URL, paste it in your meeting invitations. Video Conferencing has never been easier!
