

# TiLite Pilot

Ready for take off

permobil

---

My chair is so fast  
my friends have  
to run to keep up.

— Wyatt

## Ready to grow

The TiLite Pilot has built-in forward growth adjustment to grow with your child and maintain optimal rear wheel access. This gives kids the most efficient propulsion possible without needing to adjust or relearn their push mechanics. The TiLite Pilot lets kids cruise their world like never before.

# Designed to move

The clean frame design features a seat pan and side panels that provide easy access to the adjustment bolts, making changes simple and intuitive. Unlike on other chairs, all of these adjustments can be done without compromising access to the rear wheels.

Easy to use wheel locks are within reach

Frame designed for maximum stability

Lightweight for  
easier transport

## Cleared for landing

The ultra-lightweight design and carbon fiber frame panels make it 50% lighter and a breeze for kids to navigate all the adventures of their great big world. Quick release wheels and transit tie downs mean that bringing the pilot everywhere is also simple for mom and dad.

## Specifications
