Today’s home needs an electrical system that it can count on
to deliver comprehensive residential solutions
that will keep the home efficient, productive and safe.

Square D has been distributing electrical power to homes for over 100 years

The quality and dependability of the Square D residential product line
leads the industry by providing unsurpassed protection and reliability advantages.

- Load Centers
- Circuit Breakers
- Ground Fault & Arc Fault Circuit Interrupters
- Surge Protection
- Meter Sockets

Square D is the leading supplier of residential electrical equipment in North America.
A home is a busy place, and a commercial-grade KOHLER® automatic home generator keeps the rhythm going. A home generator keeps your power on during an outage. It’s installed outside your house (like an AC unit) and comes on automatically whether you’re home or away. All within seconds of a power outage. Clean, quiet, automatic backup power is just what a home needs to stay safe and comfortable.
In today's modern electrical household, many appliances are connected to multiple power sources and communication lines. In addition, most electrical products contain computer chips that can be damaged by even a minor electrical surge. Uncontrolled surges run the risk of overloading and destroying sensitive electronics.

A true whole house surge protection network requires three types of surge protection devices to effectively protect sensitive electrical and electronic equipment from damaging effects of voltage surges.
Today’s homeowners expect the latest in residential technology, and just as essential as an electrical system, your low voltage system is as important. HDTV, media servers, Gigabit networking, VoIP, IPTV, Wi-Fi, and broadband Internet. The connected home solutions provide the ideal backbone support network for these convenient and sophisticated technologies.
Residential electrical wiring products include switches and outlets. Although a necessity to every home, today’s electrical wiring devices are a decorative accessory that can blend in with the wall or contrast with the trim bringing a unique décor aspect to the space. Using specialty-type wiring products such as under cabinet plug strips, combination USB devices and LED sensor guide lights, will bring a custom solution to any room.
Lighting Controls

Lighting controls adjust light levels and help cut energy costs. They allow flexibility to design a lighting plan with multiple uses and decorative effects.

With the touch of a button from a wall dimmer, a smartphone or a remote, today’s lighting controls help create the exact mood desired.
A home automation system makes using technology in a home easier and more convenient by providing seamless control of your lighting, temperature, entertainment, security and window shades.

Home automation transforms a home into a state-of-the-art intelligent residence.
The most advanced residential security and safety solutions are available today. They include camera monitoring, access entry and door intercoms. These products can be controlled by home keypads, smartphone's, and iPad’s.

Smoke/CO alarms, and fire extinguishers are simple and inexpensive ways to provide safety.
Music Distribution will make a home an entertainment experience! Enjoy your favorite tunes inside & out, in one room or throughout whole house. Create a custom stereo system without the clutter of separate audio components. Wired and wireless components combined for a perfect system for your lifestyle.
An ordinary room can be turned into a theater-like experience. Home theaters today can be designed in many ways; they can be built to accommodate any lifestyle and budget.

A Home theater is all about creating a private cinema excitement!
Home ventilation is the solution in making a home comfortable, healthy and sustainable. Proper ventilation improves indoor air quality by exhausting stale air to the outdoors and systematically introduces fresh air into the home. This prevents problems like mold and mildew, ruined insulation, and wood rot.
The use of energy-efficient electric heating in a home can reduce the overall heating costs. Electric heat is clean - no flames, no fumes and it’s an easy, economical way to stay warm and comfortable. Avoid turning up the furnace and raising the temperature of the whole house. The use of electric heat provides the extra warmth right where it’s needed.
When it comes to energy management for a home, there are plenty of options. Today's products are not just environmentally, economically, and energy conscious—they are products that add ambiance, style, and convenience.

Any residential project is ideal for installing energy management solutions. They save time, money, and energy, and that is what Today's Living is all about!
Home specialty products meet the needs of today’s lifestyles. They make life more convenient, easier and complement a home’s design. Remote control shades, electric fireplaces, range hoods and central cleaning systems will transform a home into the perfect living environment.
Lighting can make a big difference in the interior environment of a home. Decorative lighting fixtures add beauty and drama to a room. It can make a small room look open and airy, and a large room appear comfortable and inviting. It can create a stimulating atmosphere for a night of entertaining, or a comfortable feeling of relaxation after a long, tiring day.
Recessed lighting can provide general, task and ambient lighting in a very subtle manner. They can be used anywhere in the home including outdoors, under eaves and on porches. Recessed Lighting can even bring music to the space by adding a built-in Bluetooth® speaker within the downlight so music can be enjoyed without adding speakers. Recessed lighting is the perfect lighting solution capable of addressing the precise lighting need.
Rail/Track lighting is excellent for its flexibility. The individual fixtures can move, swivel, rotate and aim in any direction along the lighting scheme when needed. Rail/Track lighting can bring light to areas of a home where lighting was never possible before lending elegance, expandability, and functionality.
Cabinet lighting is the perfect choice to highlight glass cabinets or to brighten up countertops. They deliver directed light to a specific area – it puts light where and when needed. Cabinet lighting serves as an extra light source in areas that lack natural light.
Outdoor decorative lighting brings interior design principles to the exterior of a home with high quality finishes and styles.

From the front of the home to the backyard deck and garden, outdoor decorative lighting brings beauty, enjoyment, and security to the outdoors.
A beautiful landscape speaks a thousand words, but when accented with light it becomes breathtaking. A home’s beauty will never fade into darkness with landscape lighting.

Creating a distinctive environment with landscape lighting will not only accent the landscape and a home’s exterior, but also the deck, ponds and pathways.
What better way to complete the finishing touches to a room than with a ceiling fan. Today’s ceiling fans excel in beauty and style and are built to last. They are also a great source of energy-efficient climate control - no matter what the season. With so many fans and accessories to choose from, there’s a perfect fan combination to meet any room’s design.
Table/Floor Lighting

Table/Floor lamps are one of the easiest, most popular and cost-effective ways to enhance the lighting and décor of a home.

Table/Floor lamps bring functionality to a space with the flexibility to move the light whenever it’s desired. It adds personality and just the right touch of style.
